U ACCESS (IRL) GCA CREDIT LONG/SHORT UCITS

Actively managed long/short corporate credit strategy focusing primarily on high-yield, investment-grade and some distressed opportunities, largely in the US

Key points

- *Credit long/short strategy with proven alpha-generation on both the long and short sides of the book*
- *Focused solution for investing in credit with limited sensitivity to interest rates, duration or other fixed income assets*
- *Diversifier to traditional assets regardless of market conditions*
- *Very experienced team – the portfolio manager has been managing this strategy for 18 years*
- *UCITS with weekly liquidity*

Investment case: A real complement to a traditional fixed income portfolio

- With current credit yields at historical lows, investors find it challenging to extract a satisfying level of steady income from traditional fixed income without taking duration or interest rate risk
- Although the high-yield space has generated steady returns over the last 10 years, the dispersion of winners and losers creates an attractive set of opportunities for a long/short strategy through credit picking (and not simply being long credit risk)
- Credit conditions have been too easy for corporates and leverage has increased dramatically

Top 10 gainers & losers within the HY universe

Sources: J.P. Morgan, UBP, 31.12.2019
Past performance is not indicative of future results

Investment team: Global Credit Advisers, LLC

- CIO Steven Hornstein has more than 37 years of experience in credit markets and has gone through multiple credit cycles
- He is backed up by an experienced team of 15, including 8 investment professionals
- The investment team has on average of over 20 years of experience in research, portfolio management and trading through various credit cycles
- Most of the team has been working together for more than 10 years
- The chief risk officer, who has over 25 years of industry experience, is independent from the investment team and has the authority to reduce risk in the portfolio

Fund concept: Generating steady performance via credit picking

- Actively managed long/short corporate credit strategy investing predominantly in high-yield, investment-grade bonds, credit default swaps, distressed debt, equities and bank loans
- Portfolio of approximately 100 positions, well diversified by sector and credit instrument
- Acts as a complement to a traditional fixed-income portfolio, targeting a net return of between 5% and 10% in USD depending on the opportunity set, with contained volatility

Investment process

- Fundamental research process to capitalise on an information base built on decades of experience
- 5-step process: initial screening of the universe, idea-sourcing, identification of candidates, portfolio construction and ongoing monitoring
 - Initial screening and sourcing including liquidity, sector and proprietary screens, macro drivers, portfolio priorities, sector fundamental analysis and review of research and publications
 - Identification of candidates and portfolio construction including company fundamentals and pricing analysis, identification of potential regulatory/legal/tax issues, thematic focus, sector diversification, determination of entry and exit points
 - Ongoing valuation and liquidity monitoring on each position and across the portfolio

Investment guidelines

- Target number of portfolio positions: 100+
- Core long positions: 3–7%; short positions: 2–5%
- Gross exposure: 100–300%, adjusted dynamically depending on opportunity set
- Net exposure, dictated by bottom-up portfolio construction and adjusted actively: between -50% and +100%
- Diversification across 15–24 sectors
- Top 10 positions: 20–50% of NAV
- Average portfolio turnover: 80% per month of AUM
- Target volatility: 6% (dependent on market environment)
