UBAM – SWISS SMALL AND MID CAP EQUITY

Accessing global growth opportunities through high-quality Swiss small- and mid-cap stocks

UBAM - Swiss Small and Mid Cap Equity is an actively managed, concentrated portfolio of the investment team's high-conviction ideas in the Swiss non-large cap space. Those companies tend to have globally-exposed revenue streams, manufacture high value-added products and/or occupy specialised market segments in which they are often leaders.

Key points

- *Swiss small and mid caps offer exposure to global growth through solid, well-managed companies with high value-added products and services*
- *Investing in Swiss equities across the CFROI® life cycle, i.e. in a mix of growing, fade-beating and turnaround companies*
- *High-conviction, concentrated portfolio of the team's best ideas in a market with compelling opportunities for talented stock-pickers*
- *Aiming for a low carbon footprint relative to its investment universe, along with ESG integration across the investment process*
- *Stable and experienced team managing Swiss equities since 2006*
- *Belgian "Towards Sustainability" Label in Q1 2021***

Investment case

Swiss companies are known for being large globally-dominant firms – often household names in their industry. But the Swiss small- and mid-cap space also contains market-leading companies, generally catering to more niche industry segments globally.

The SPI Extra (the Swiss small- and mid-cap index) has demonstrated strong long-term returns, driven by generally higher underlying growth rates, while both the SPI and the SPI Extra have delivered significantly higher returns than global equity markets. The SPI Extra contains all Swiss-listed stocks excluding the 20 largest ones (which constitute the SMI) and is well-diversified from both a stock and a sector perspective.

Fund concept

UBAM - Swiss Small and Mid Cap Equity is a concentrated portfolio of 45–65 of the team's highest-conviction small- and mid-cap names. The team aims to identify leading companies in terms of value creation along the Cash Flow Return on Investment (CFROI®) life cycle. The CFROI® life cycle framework is at the base of the team's fundamental company valuation approach. The team seeks to identify three particular types of stocks: "growing" companies' stocks whose potential is underestimated by the market, companies generating consistently high CFROI®s able to 'beat the fade' in returns over time, and "turnaround" companies able to restructure in difficult times.

The fund aims to outperform the SPI Extra, driven by a bottom-up approach with active management of the portfolio tracking error, which generally ranges between 4% and 8%.

ESG criteria are embedded throughout the investment process which includes ESG integration, negative screening (via an exclusion policy and norms-based screening), engagement and proxy voting, as well as a low carbon footprint objective.

Investment team

- The team of four dedicated portfolio managers combines over 50 years of experience in financial markets and makes full use of UBP's global research resources of over 40 investment professionals
- The fund is managed by Eleanor Taylor Jolidon, Co-Head of UBP's Swiss and Global Equity team based in Geneva, with Bettina Baur, Senior Portfolio Manager, as deputy manager

Investment process

- The bottom-up analysis involves detailed fundamental and quantitative research including ESG criteria, and regular company meetings. The team seeks to identify long-term return potential which is not yet reflected in valuations, by understanding the competitive advantages and management capabilities of each company.
- The top-down perspective gained from meeting with external and internal strategists and macroeconomists allows the team to position the portfolio according to market conditions.
- Portfolio construction is based on the team's assessment of company prospects, catalysts and risks, and contribution to tracking error.
- The portfolio aims for a low carbon footprint relative to its investment universe.
- Risk management takes into account portfolio beta, tracking error and stock intercorrelations.
- Portfolio tracking error is actively managed i.e. the team varies the amount of risk taken according to their view of the market environment and opportunity set.

Pursuant to Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector (the "Disclosure Regulation" or "SFDR"), funds are required to make certain disclosures. Funds falling under the scope of Article 6 of the SFDR are those which have been deemed not to pursue an investment approach that explicitly promotes environmental or social characteristics or has sustainable investment as its objective. The investments underlying such financial products do not take into account the EU criteria for environmentally sustainable economic activities. Notwithstanding this classification, the Investment Managers may take account of certain sustainability risks as further described in the fund's prospectus. Funds falling under the scope of Articles 8 or 9 of the SFDR are those subject to sustainability risks within the meaning of the SFDR. The sustainability risks and principal adverse impacts (PAIs) as stipulated in the SFDR are described in the prospectus. In addition, unless otherwise specified, all funds apply the UBP Responsible Investment Policy, which is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>.

UBP relies on information and data collected from third-party ESG data providers (the "ESG Parties"). Although UBP applies a proven process for selecting such ESG Parties, this data may prove to be incorrect or incomplete. UBP's processes and proprietary ESG methodology may not necessarily appropriately capture ESG risks. Indeed, to date, data related to sustainability risks or PAIs are either not available or not yet systematically and fully disclosed by issuers, may be incomplete and may follow various differing methodologies. Most of the information on ESG factors is based on historical data that may not reflect the future ESG performance or risks of the investments.

Although the ESG Parties obtain information from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness of any data herein. None of the ESG Parties makes any express or implied warranties of any kind, and the ESG Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to any data herein. None of the ESG Parties shall accept any liability for any errors or omissions in connection with any data herein. Further, without limiting any of the foregoing, in no event shall any of the ESG Parties accept any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Any subscriptions not based on the funds' latest prospectuses, KIDs or KIIDs (as applicable), annual or semi-annual reports or other relevant legal documents (the "Funds' Legal Documents") shall not be acceptable. The KIDs are translated into the local language of each country where the share class is registered and available on UBP's website: <https://www.ubp.com/en/funds.html>.
