UBAM - MULTIFUNDS ALTERNATIVE

A high-conviction portfolio giving access to top managers within the alternative UCITS universe

Key points

- ◆ *Absolute return solution acting as a complement to a traditional fixed income portfolio given expectations of a rising yield environment*
- ◆ *Diversified portfolio of over 10 names selected from UBP's Approved List of Alternative UCITS funds*
- ◆ *Controlled beta to equities, moderate volatility budget*
- ◆ *UCITS, weekly liquidity*

Investment team

- ◆ UBP alternative investments team of more than 10 professionals from research to risk monitoring
- ◆ Portfolio Manager is industry veteran Robert Khoury
- ◆ Long track record in managing portfolios of alternative funds, both multi-strategy and thematic
- ◆ Strong and rigorous risk management process

Investment case: providing alternatives to traditional bonds as a source of yield

- ◆ With current yields at historical lows, investors find it challenging to extract a satisfying level of steady income from traditional fixed income instruments.
- ◆ This market regime is expected to last, with increased interest rate volatility ahead due to a new rising rate cycle in the US and quantitative easing ending in some other regions like Europe.
- ◆ In that context, an increasing number of bond investors are looking for additional sources of yield to complement their fixed income portfolios.
- ◆ UBAM - Multifunds Alternative is a multi-strategy, absolute return portfolio invested in high-conviction names within the Alternative UCITS universe. It combines the risk-adjusted benefits of alternative funds with the increased investment comfort provided by the UCITS framework. Its volatility budget is similar to that of traditional fixed income instruments.

Trading	Managers with strong trading skills: Discretionary Global Macro, CTA, L/S Equity with a trading bias
Fundamental Value	Fundamental managers seeking to exploit valuation opportunities

Main risks

Currency risk: The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Counterparty risk: As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.
