What is this product?

TYPE OF PRODUCT

The Fund is a sub-fund of UBAM, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide on its pure and simple liquidation if its net assets represent less than EUR 10 million (or equivalent value in another currency) or if the economic and/or political environment was to change or for any economic and financial reasons for which the Board of Directors considers that it is in the general best interests of shareholders to liquidate the Fund.

OBJECTIVES

The Fund seeks to grow capital and generate income by investing at least 70% of its net assets in equities issued by companies having their registered office in the European Union, in the United Kingdom, in the European Economic Area and/or Switzerland and up to 15% in the Emerging countries.

The Fund is actively managed and relatively concentrated (typically containing 35-45 names) with low turn-over and may invest up to 25% of its net assets in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities and money market instruments.
The Fund has no restriction on the percentage invested in small and mid-capitalization, but with a minimum market capitalization of EUR 200 million or equivalent.
100% of the invested companies are positive contributors to one or more environmental / social objectives.

The Fund addresses the United Nation's Sustainable Developments Goals through 6 themes, 3 environmental (healthy ecosystems, climate stability, sustainable communities) and 3 societal (basic needs, health & wellbeing, inclusive & fair economies).
The primary sustainable objective is to invest in companies which have products, services and/or processes which contribute to the solution of environmental and/or social problems as defined by the UN, including, but not limited to climate change mitigation, promotion of circular economy solutions, affordable healthcare and education, and the protection and restoration of biodiversity.
The construction of the universe is driven by positive inclusion, rather than exclusion. That is to say, through the 6 thematic lenses, the Investment Manager builds a universe through adherence to the the intensity of impact (IMAP) system and positive Environmental, Social and Governance (ESG) credentials.
The Investment Manager performs a negative screening, based on the exclusion list and ESG profile to filter the investment universe. Impact and ESG credentials are fully integrated into decision making regarding the purchase, sale and position-sizing of underlying holdings. The IMAP score in combination with ESG and financial analysis will determine the size of the positions in the portfolio.
The investment process draws from the collaboration of the Investment Manager (Union Bancaire Privée, UBP SA) with Cambridge Institute for Sustainability Leadership ("CISL"). CISL is not involved in the stock selection of this Fund. The ESG analysis covers at least 90% of the Fund's portfolio.

A performance fee in reference to the MSCI Europe Equity Index (the "Benchmark") is applied to some share classes. The Benchmark is representative of the investment universe and of the risk profile of the Fund. The Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, especially in view of the fact that the Benchmark is a standard reference used to frame the Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Fund.

The Fund's base currency is EUR.

As an equity fund, its holdings can move in line with or return less than the broad stock market, so investors should be aware that the value of their holdings could fall and that they may not get back their initial investment.

Any income received by the Fund is reinvested (capitalisation share class).

INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The Fund is compatible with investors who may bear capital losses and who do not need capital guarantee. The Fund is compatible with clients who wish to hold their investment over 5 years.

What are the risks and what could I get in return?

Risk indicator

1	2	3	**4**	5	6	7

Lower risk **Higher risk**

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level. Poor market conditions could impact the Fund's capacity to pay you.

Please refer to the prospectus for more information on the specific and material risks relevant to the Fund not included in the summary risk indicators.

This Fund does not include any protection from future market performance, so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: **Example investment:**		**5 years** **CHF 10'000**		
		If you exit after 1 year	**If you exit after 5 years**	
Scenarios				
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**			
Stress scenario	**What you might get back after costs**	CHF 2'230	CHF 2'090	
	Average return each year	-77.7%	-26.9%	
Unfavourable scenario	**What you might get back after costs**	CHF 6'780	CHF 6'780	This type of scenario occurred for an investment in the product between June 2021 and June 2022.
	Average return each year	-32.2%	-7.5%	
Moderate scenario	**What you might get back after costs**	CHF 10'160	CHF 12'120	This type of scenario occurred for an investment in the proxy then the product between March 2017 and March 2022.
	Average return each year	1.6%	3.9%	
Favourable scenario	**What you might get back after costs**	CHF 16'210	CHF 16'580	This type of scenario occurred for an investment in the proxy then the product between June 2016 and June 2021.
	Average return each year	62.1%	10.6%	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if the product is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with BNP Paribas S.A., Luxembourg Branch and are segregated from the assets of other sub-funds of the SICAV. The assets of the Fund cannot be used to pay the debts of other sub-funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- CHF 10'000 is invested

Investment of CHF 10'000	**If you exit after 1 year**	**If you exit after 5 years**
Total costs	CHF 469	CHF 1'426
Annual cost impact (*)	4.7%	2.3%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.2% before costs and 3.9% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
