Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

ABOUT THE FUND

The Fund seeks to grow capital and generate income primarily by investing in regulated UCITS and non-UCITS funds which have as investment objective to mainly invest in equities and other similar transferable securities with no restrictions about region, country (including emerging markets), industry sector or capitalization. The non UCITS funds will be submitted to a regulatory supervision equivalent to a UCITS.

The Fund aims to invest in a range of themes having the potential to have a material effect on the world and financial landscapes with long-term and lasting effects (secular trends). These trends can be related to climate change, demographics, consumption patterns and disruptive innovation (technology or business model whose application significantly affects the way a market or industry functions), although this list is not intended to be exhaustive.

The Fund is actively managed and well diversified, mainly investing in securities denominated in US Dollars, but some foreign currency exposure may be taken. These investments may or may not be hedged at the investment manager discretion.

On an ancillary basis, the Fund may also invest in liquid assets as well as derivative instruments for hedging purposes.

The Fund is not managed in reference to a benchmark.

GLOSSARY

Multifunds

Multi-manager investment strategy that is a pooled investment fund investing in other types of funds. In other words, its portfolio contains underlying portfolios of other funds. These holdings replace any direct investment in bonds, stocks, and other types of securities.

Demographics

The Demographics bucket aims to invest in a range of themes that have the potential to benefit from long-term trends in demographics. These themes can be related to trends such as population ageing, population growth, the emergence of the middle class and urbanisation.

Consumption Patterns

The Consumption Patterns bucket aims at capitalising on themes related to evolving consumption patterns. These themes can in turn be related to such trends as environmental protection, the emergence of the middle class, urbanisation, millennials and digitalisation.

Disruptive Innovation

The Disruptive Innovation bucket aims at investing in a range of themes related to

technologies or business models whose application significantly affects the way a market or industry functions. These themes can be related to such trends as industry 4.0, digitalisation and healthcare innovation.

Climate Change

The Climate Change bucket aims at investing in a range of themes providing solutions to the challenge of climate change. These themes can be related to such trends as clean energy, emission reduction, resource efficiency, water supply, and evolving mobility.

Derivatives

Derivatives are financial instruments whose prices depend on the price movements in a reference variable, known as the underlying. Underlying assets can be shares, equity indices, government bonds, currencies, interest rates, commodities like wheat and gold, or swaps. Derivative financial instruments may be unconditional forward transactions or they may be options. They are traded either on futures and options exchanges on standardised terms, or over-the-counter (OTC) on freely negotiated terms. Under certain circumstances changes in the price of the underlying can lead to considerably higher price fluctuations in the derivative. Derivatives can be used to hedge against financial risks, to speculate on price changes (trading) or to take advantage of price differences between markets (arbitrage).
