## What is this product?

### TYPE OF PRODUCT

The Fund is a sub-fund of UBAM, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

### TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide on its pure and simple liquidation if its net assets represent less than EUR 10 million (or equivalent value in another currency) or if the economic and/or political environment was to change or for any economic and financial reasons for which the Board of Directors considers that it is in the general best interests of shareholders to liquidate the Fund.

### OBJECTIVES

The Fund seeks to grow capital and generate income by investing primarily up to 100% in worldwide hybrid securities such as:

- Contingent Convertible bonds ("Cocos") with specific loss-absorbing mechanisms including permanent write-down, temporary writedown or conversion into equity
- Hybrid securities such as financial and non-financial subordinated debt.

The Fund is actively managed.

The Fund is allowed to invest without limits in currencies other than its base currency (USD) but the currency risk is limited to 10% of its net assets.

A minimum of 50% of the bond investments will be in issuers deemed to maintain sustainable characteristics with a minimum Environmental, Social and Governance (ESG) rating of BBB for developed market issuers and BB for emerging market issuers as measured by MSCI ESG research or if such rating is not available an equivalent internal rating assigned by the Investment Manager. ESG investment strategy is based on three pillars: (i) Sector exclusion according to the UBP Responsible Investment policy; (ii) ESG integration to select issuers through the analysis of ESG and financial factors; (iii) a preference for Green, Social and Sustainability bonds.

The Fund uses the index BofA Contingent Capital Index hedged to USD (the "Benchmark") for risk monitoring. The Fund's investment objective does not aim to replicate this Benchmark nor to define the Fund's investment universe. The Fund's performance is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors and issuers, in order to take advantage of specific investment opportunities.

The Fund may invest its net assets up to:

- 100% in High yield
- 100% in Cocos
- 30% in Emerging countries (including China through Bond Connect)
- 10% in equity including equity derivatives.

Cocos will have a minimum rating of B- (or equivalent), will be issued by banks whose parent company has a minimum balance sheet of USD 100 billion and whose parent company is domiciled in countries rated with a minimum rating of BB- (or equivalent).

High yield rated securities and higher risk bonds are issued by entities whose activity is more sensitive to the economic cycle and therefore pay a higher interest rate than investment grade bonds to compensate for the increased risk.

The Fund's base currency is USD.

The minimum initial investment is USD 50'000 or equivalent.

The share currency risk in relation to the Fund's base currency is mainly hedged.

Any income received by the Fund is distributed (distribution share class).

### INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with average knowledge of the underlying financial instruments and some financial industry experience. The Fund is compatible with investors who may bear capital losses and who do not need capital guarantee. The Fund is compatible with clients who wish to hold their investment over 3 years.

### OTHER INFORMATION

The depositary is BNP Paribas S.A., Luxembourg Branch.

The registrar and transfer agent is Caceis Bank, Luxembourg Branch.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product for 3 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		3 years CHF 10'000		
		If you exit after 1 year	If you exit after 3 years	
<b>Scenarios</b>				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	CHF 4'090	CHF 5'410	
	Average return each year	-59.1%	-18.5%	
Unfavourable scenario	What you might get back after costs	CHF 8'250	CHF 8'250	This type of scenario occurred for an investment in the product between June 2021 and June 2022.
	Average return each year	-17.5%	-6.2%	
Moderate scenario	What you might get back after costs	CHF 10'370	CHF 12'080	This type of scenario occurred for an investment in the proxy between February 2014 and February 2017.
	Average return each year	3.7%	6.5%	
Favourable scenario	What you might get back after costs	CHF 11'990	CHF 13'590	This type of scenario occurred for an investment in the proxy then the product between February 2016 and February 2019.
	Average return each year	19.9%	10.8%	

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if the product is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with BNP Paribas S.A., Luxembourg Branch and are segregated from the assets of other sub-funds of the SICAV. The assets of the Fund cannot be used to pay the debts of other sub-funds.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10'000 is invested

Investment of CHF 10'000	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	CHF 367	CHF 610
<b>Annual cost impact (*)</b>	3.7%	1.8%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.3% before costs and 6.5% after costs.

## Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 3.00% of the amount you pay in when entering this Investment.	Up to CHF 300
