UBAM – EMERGING MARKET DEBT OPPORTUNITIES

Take advantage of investment opportunities in emerging fixed-income markets, through a unique, diversified and asymmetric investment solution

UBAM - Emerging Market Debt Opportunities invests in fixed-income securities issued by emerging sovereign and corporate issuers in hard and local currencies. Emerging market fixed income offers more attractive yields and return potential than developed market bonds.

Key points

- *Allocation across a wide range of emerging fixed-income market instruments*
- *Diversification and yield enhancement over developed market bond portfolios*
- *Reduced volatility and drawdown through diversification, the absence of benchmark constraints, and the use of protection strategies and cash in times of heightened volatility*
- *Experienced team which has successfully managed EM bond portfolios across different economic cycles*

Investment case

Emerging countries account for more than 50% of the world's GDP, and this proportion is set to increase. Their superior growth outlook is supported by higher demographic growth than developed countries, as well as by improving economic fundamentals, fiscal situations and external finances.

Emerging market (EM) sovereign and corporate bonds typically offer higher yield and return prospects than their developed market peers. Moreover, EM bonds tend to have a relatively low correlation with other asset classes and are therefore an efficient tool for portfolio diversification.

Fund concept

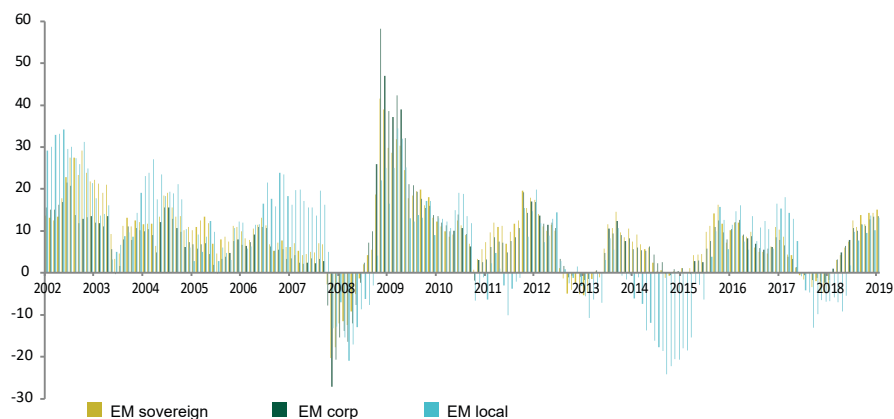

UBAM - Emerging Market Debt Opportunities offers investors direct access to all EM fixed income hard- and local-currency assets within one single investment solution.

The allocation across EM fixed income asset classes is based on the team's assessment of EM fundamentals and global market trends, while the bond selection reflects the team's best bets.

The sub-fund is actively managed and follows an unconstrained and asymmetric investment style, with a dual objective: to outperform EM sovereign debt over the investment cycle and to limit volatility and drawdowns.

Subscriptions and redemptions are daily.

Investment process

- Our investment process is built on strong in-house macroeconomic research and credit analysis.
- The team manages all potential sources of alpha, from allocation to issuer/issue credit selection, duration and curve positioning.
- Our process avoids any benchmark constraints and places a strong emphasis on liquidity, diversification and drawdown management.
- Depending on the team's assessment of global macro and market trends, the portfolio's asset allocation will be invested according to one of four model portfolios (ranging from "Protection" to "Dynamic").

Investment guidelines

- Max. weight per country: 10%
- Max. weight per investment-grade quasi-sovereign or corporate: 5%
- Max. weight per high-yield quasi-sovereign or corporate: 3%
- Max. EM local debt: 30% (in "Dynamic" model)
- Max. cash exposure: 49% (in "Protection" model)

Investment team

- A seasoned team of eight professionals entirely devoted to emerging markets, including three portfolio managers, four credit analysts and one macro & FX strategist
- Supported by UBP's global presence and research teams on the ground
