## ABOUT THE FUND

The Fund seeks to grow capital and generate income primarily by investing in Japanese equities. The Fund is actively managed and relatively concentrated (typically containing 25-60 names) with low turn-over, investing mainly in securities denominated in Japanese Yen. The Fund is focused primarily on the most ESG (Environmental, Social and Governance) conscious companies according to the investment manager's research. A performance fee in reference to the Tokyo SE (TOPIX) Total Return Index is applied to some share classes (the "Benchmark"). The Benchmark is not representative of the Fund's risk profile and the portfolio's investments will deviate materially from the Benchmark.

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

GLOSSARY

**Benchmark**  
Index used as basis for measuring the performance of an investment fund. Also called reference index or comparison index.

**Derivatives**  
Derivatives are financial instruments whose prices depend on the price movements in a reference variable, known as the underlying. Underlying assets may be shares, equity indices, government bonds, currencies, interest rates, commodities like wheat and gold, or

also swaps. Derivative financial instruments may be unconditional forward transactions or they may be options. They are traded either on futures and options exchanges on standardised terms, or over-the-counter (OTC) on freely negotiated terms. Changes in the price of the underlying lead in certain situations to considerably higher price fluctuations in the derivative. Derivatives can be used to hedge against financial risks, to speculate on price changes (trading) or to take advantage of price differences between markets (arbitrage).
