Past performance is not indicative of future results

Investment case: providing alternative sources of yield for traditional bonds

- With current yields at historical lows, investors find it challenging to extract a satisfying level of steady income from traditional fixed-income instruments.
- This market regime is expected to last, with investors facing increased interest-rate volatility due to a new rising rate cycle in the US and quantitative easing ending in other regions, such as Europe.
- In this context, an increasing number of bond investors are looking for additional sources of yield to complement their fixed-income portfolios.
- U Access (IRL) Trend Macro tends to find diversifying return drivers in specific markets, scouring the world for growth and transformation themes in both developed and emerging markets.
- The fund aims to reduce risk within a global portfolio by lowering volatility, drawdowns and correlation to all assets.

Fund concept: diversifying return drivers and risk exposures from a traditional fixed-income portfolio

- Diversified portfolio of 10 to 20 investment themes implemented via various trades, both long and short
- Trades primarily in fixed income, foreign exchange, sovereign and corporate credit and equity indices, all across liquid markets
- Relies on deep fundamental research
- Expands the traditional global macro opportunity set by seizing EM investment opportunities on top of DM themes
- 5% volatility budget; little to no correlation to bond and equity markets

Investment team – Trend Capital

- Investment team led by Ashwin Vasani, CIO and founder. Extensive experience in running global macro books in different firms (e.g. Tudor, Oppenheimer and Shumway)
- 7 additional investment professionals
- Strong and global network of resources
- Risk-management focused
- Proven track record, having successfully navigated various challenging environments
- Multi-award-winning

Investment process

- A fundamental-based approach to identify trends
- Drivers of these trends isolated and evaluated via a “deep dive” into macroeconomic fundamentals
- Proprietary models to quantify the relevant variables affecting these trends
- Qualitative factors assessed through in-country visits with government and business officials
- Market technicals and valuations considered when selecting the trends we believe offer the best investment opportunities
- Trades constructed with the goal of maximising risk–return and building asymmetry into the portfolio
- Risk managed in three ways: portfolio construction, hedging, and stress-testing
- Portfolio of 10 to 20 investment themes
- Combination of “risk-on” and “risk-off” books across rates, credit and currencies
- Average holding period of 3 months per theme

SRRI

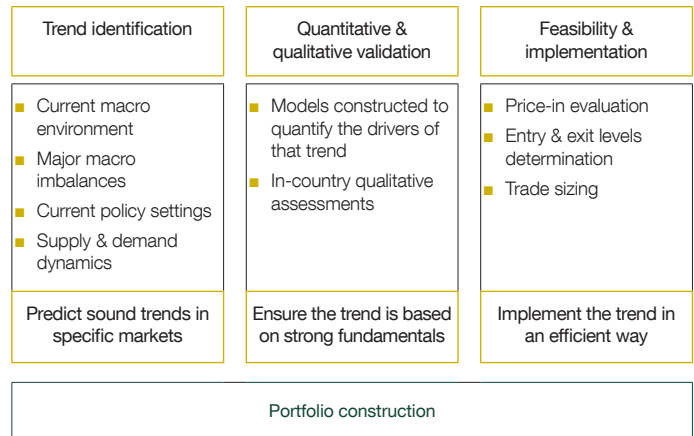

With lower risk, potentially lower rewards							With higher risk, potentially higher rewards	
1	2	3	4	5	6	7		

The SRRI (Synthetic Risk and Reward Indicator) relates to the B USD share class IE00BVB2SM93 as of 31.01.2020 and may differ for other share classes of the same fund.

This indicator represents the fund's annual historical volatility. The level assigned reflects the risk/return profile: 1: lowest; 2: low; 3: limited; 4: average/moderate; 5: high; 6: very high; 7: highest.

Historical data such as that used to calculate the SRRI cannot be considered a reliable indication of the fund's future risk profile. The risk category associated with the fund is not guaranteed and may change over time.
