

For Qualified Investors in Switzerland, or Professional Investors or Eligible Counterparties as defined by the relevant laws

UBAM – EMERGING MARKETS FRONTIER BOND

Benefit from attractive yields, strong risk-adjusted return potential and a high level of diversification by investing in issuers from the world's most dynamic EM frontier countries

UBAM – Emerging Markets Frontier Bond invests primarily in bonds issued by sovereign and quasi-sovereign entities domiciled in, or linked to, frontier countries, and denominated in hard currencies. It is actively managed and aims to take advantage of the attractive yields offered by these under-researched issuers.

Key points

- *Invest in issuers from some of the fastest-growing economies in the world*
- *Benefit from the attractive yields and strong risk-adjusted return potential offered by these under-researched markets*
- *Active management based on thorough fundamental sovereign analysis*
- *Experienced investment team with a proven track record in managing EM fixed-income products*

Investment case

Frontier markets are fast-growing emerging economies with typically smaller external debt markets than traditional EM (BRICS) countries. These markets offer a compelling investment opportunity, with returns which have demonstrated their ability to outpace both broader EM sovereign and developed high-yield bond markets.

Indeed, while these countries are amongst the most dynamic in the world, they are often disregarded by investors due to risk-averseness or a lack of research. This results in attractive risk premia, which have historically over-compensated investors given the historically relatively low sovereign default rates and high recovery values.

In addition, thanks to their unique characteristics, frontier bond markets can offer strong diversification benefits when added to a traditional balanced portfolio.

Fund concept

The fund invests primarily in bonds issued by sovereign and quasi-sovereign entities domiciled in, or linked to, frontier countries, and denominated in hard currencies.

It is actively managed with thorough fundamental sovereign analysis and an explicit focus on assessing restructuring risk and recovery potential.

The team also pays attention to the countries' ability to make and implement good policies, which is a critical factor in creating and achieving inclusive growth and, in turn, leads to improved fiscal metrics and credit performance.

Up to 20% may be invested in EM corporate bonds and local debt to increase diversification.

Subscriptions and redemptions are daily.

Frontier markets around the world

Investments will be made primarily, but not exclusively, in issuers from the frontier markets highlighted in the map

Investment process

- Sovereign credit selection is the primary pillar of the EM frontier bond management process.
- Each country is reviewed in depth by the Sovereign Committee, including macroeconomic developments, policy-making, politics, technicals, and market factors, using both fundamental research and proprietary quantitative tools.
 - Where necessary, a further analysis predicated on the IMF Debt Sustainability Framework is carried out.
 - Security selection involves a detailed review of the instrument's characteristics and relative value.
- Particular focus is placed on strict risk-management, diversification and liquidity.

Global Market Trends	Fundamental Country Analysis	Relative Value and Bond Selection
<ul style="list-style-type: none"> - Global business cycle and risk appetite - G3 monetary policy - Commodities - Asset class technicals 	<ul style="list-style-type: none"> - Quantitative and qualitative analysis - Dynamic, short-term outlook - Assessment of restructuring risk & recovery potential 	<ul style="list-style-type: none"> - Credit analysis - RV analysis – comparison across countries and instruments - Bond analysis, covenants, spread duration, market, etc. - Bond technicals
Investment Committee	Sovereign Committee	Portfolio Management
Portfolio's key metrics (e.g. duration) and allocation	Country target positioning	Issuer and bond selection
Portfolio construction & risk monitoring
