Class: IC EUR (Capitalisation) LU2351049460

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow capital and generate income by investing primarily in global green bonds that contribute to environmental sustainability and may also invest in social or sustainability bonds that contribute to social and/or environmental sustainability issued by worldwide corporates.

The Fund is actively managed.

The Fund is allowed to invest in currencies other than its base currency (EUR) but the currency risk is limited to 10% of its net assets.

The investment universe of this Fund is based on the Green Bond Principles and Social Bond Principles as formulated by the International Capital Market Association. Furthermore, issuers and underlying projects are screened using a proprietary assessment methodology.

Bond investments will be in issuers deemed to maintain sustainable characteristics with a minimum ESG rating of BBB for developed market issuers and BB for emerging market issuers as measured by MSCI ESG research or if such rating is not available an equivalent internal rating assigned by the Investment Manager. ESG investment strategy is based on two pillars: (i) Sector exclusion according to the UBP Responsible Investment policy; (ii) ESG integration to select issuers through the analysis of environmental, social and governance factors.

The Fund is not managed in reference to a benchmark.

The Fund may invest its net assets up to:
- 100% in Investment grade
- 20% in High yield
- 20% in Emerging countries (including China through Bond Connect)
- 20% in Contingent Convertible bonds (Cocos) with a minimum rating of B- (S&P or Fitch) or B3 (Moody's)
- 5% in equity, including equity derivatives.

The Fund's value is calculated and expressed in Euros.

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg except days where the decisive markets are closed: United Kingdom (UK), Eurex, United States (US).
Details of the closing days are available here:

1	2	**3**	4	5	6	7

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 3 reflects limited potential gain and/or loss in the value of the portfolio.

This is due to investments in fixed income securities on the European market.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.
