## UBAM – CORPORATE GREEN BOND

Exposure to the fast-growing market of green and social bonds\* issued by financial and non-financial companies

Green bonds cover a variety of projects such as renewable energy, energy efficiency, green buildings and clean transportation. This fund seeks to generate returns for fixed income investors while contributing to the effort to preserve the environment.

### Key points

- *Raising capital for projects with environmental benefits*
- *Financial and non-financial credit issuers*
- *ESG factors integrated in the selection of issuers*
- *SFDR Article 9 sub-fund*

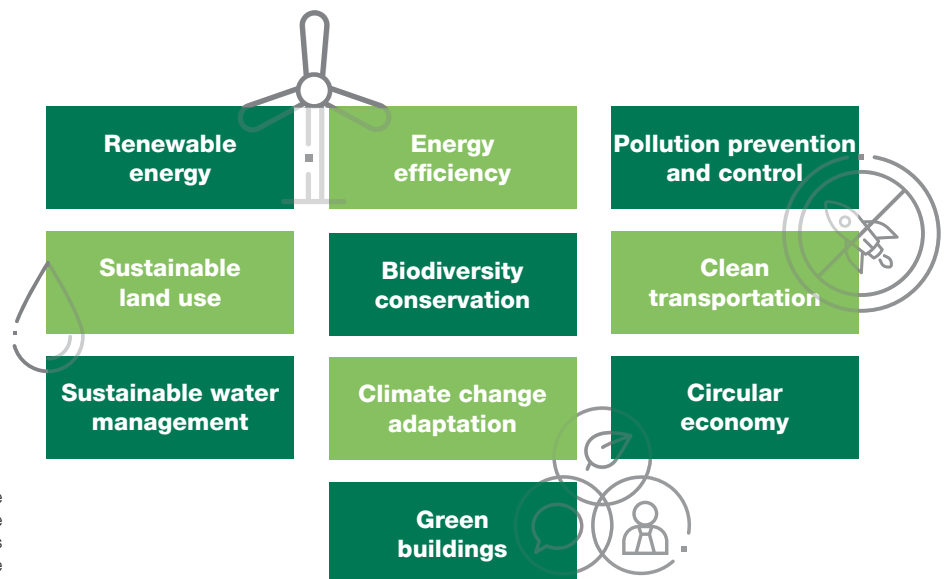

### Investment case

Green bonds enable capital-raising and investment for new and existing projects with environmental benefits through initiatives in renewable energy, energy efficiency, green buildings, clean transportation and more. With green bonds, investors earn income from corporate credit while financing environmentally sound and sustainable projects that foster a net-zero emissions economy and protect the environment.

### Fund concept

The fund provides the investor with exposure to the fast-growing market of green and social bonds\* issued by both financial and non-financial companies. The portfolio will be predominantly invested in investment-grade issuers. It can invest in green bonds across currencies, though principally in EUR and in USD, with positions hedged back to EUR, the fund's base currency. Exposure to non-investment-grade issuers is limited to 20% of the portfolio. The sub-fund is not benchmarked.

### Green bond categories

\*Social bonds are use-of-proceeds bonds that raise funds for new and existing projects with positive social outcomes. The categories for such projects include, for instance, affordable basic infrastructure (e.g. sanitation, transport, and energy), access to essential services (e.g. healthcare, education and vocational training, and financial services) or affordable housing.
