#### SPECIFIC RISKS

- ◆ **Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.
- ◆ **Currency risk:** The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.
- ◆ **Counterparty risk:** As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

#### ABOUT THE FUND

The Fund seeks to grow capital and generate income primarily by investing in equities issued, for at least 50% of its net assets in companies having their registered office in the European Union, in the United Kingdom, in the European Economic Area and/or in Switzerland.

The Fund is actively managed and relatively concentrated (typically containing 25-35 names).

The Fund addresses the fastest growing part of the "sustainable" investment universe - i.e. socially responsible investing. The investment process draws from the collaboration of the investment manager (Union Bancaire Privée, UBP SA) with Cambridge Institute for Sustainability Leadership ("CISL").

CISL is not involved in the stock selection of this Fund.

A performance fee in reference to the MSCI Europe Equity Net Return Index is applied to some share classes (the "Benchmark"). The Benchmark is not representative of the Fund's risk profile and the portfolio's investments will deviate materially from the Benchmark.

The Fund may invest up to:

- 100% of its net assets in Small and Mid-Capitalization (with a minimum market capitalization of EUR 200'000'000 or equivalent)
- 50% of its net assets in Global Equity (including emerging markets)
- 20% of its net assets in fixed income and money market instruments.

#### PERFORMANCE EVOLUTION EUR (NET OF FEES)

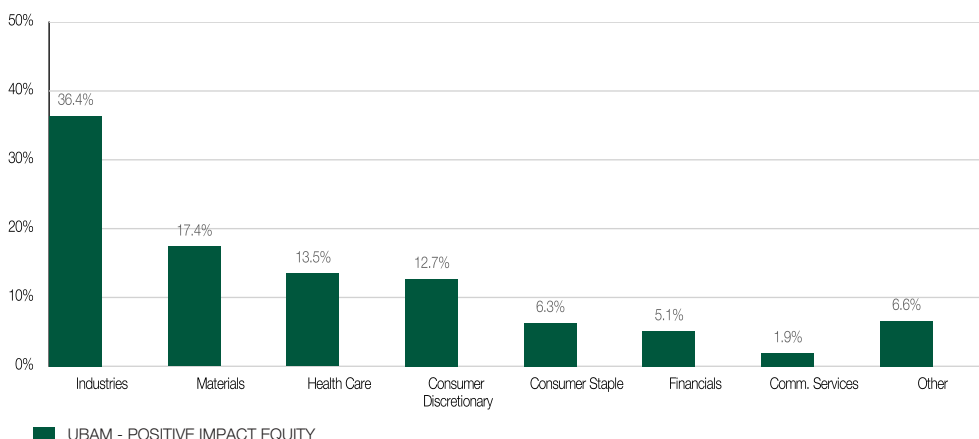

Performance over 5 years or since inception. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise.

#### PERFORMANCE HISTORY EUR (NET OF FEES)

	YTD	2020	2019	2018		
UBAM - POSITIVE IMPACT EQUITY	4.65 %	21.41 %	27.20 %	-14.67 %		
	May 2021	3 months	1 year	3 years	5 years	Since inception
UBAM - POSITIVE IMPACT EQUITY	-1.51 %	6.32 %	39.95 %			37.91 %

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

## GLOSSARY

### Benchmark

Index used as basis for measuring the performance of an investment fund. Also called reference index or comparison index.

### Derivatives

Derivatives are financial instruments whose prices depend on the price movements in a reference variable, known as the underlying. Underlying assets may be shares, equity indices, government bonds, currencies, interest rates, commodities like wheat and gold, or

also swaps. Derivative financial instruments may be unconditional forward transactions or they may be options. They are traded either on futures and options exchanges on standardised terms, or over-the-counter (OTC) on freely negotiated terms. Changes in the price of the underlying lead in certain situations to considerably higher price fluctuations in the derivative. Derivatives can be used to hedge against financial risks, to speculate on price changes (trading) or to take advantage of price differences between markets (arbitrage).
