What is this product?

TYPE OF PRODUCT

The Fund is a sub-fund of U ACCESS, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide on its pure and simple liquidation if its net assets represent less than EUR 20 million (or equivalent value in another currency) or if the economic and/or political environment was to change or for any economic and financial reasons for which the Board of Directors considers that it is in the general best interests of shareholders to liquidate the Fund.

OBJECTIVES

The Fund seeks to grow capital and generate income by investing primarily in long and short positions on Japanese equity markets.
Long positions in companies having a good corporate governance will be achieved through direct physical holdings and/or through financial derivatives whereas short positions in companies having a lesser corporate governance will be achieved through the use of financial derivative instruments.

The Fund is actively managed and will invest in large cap equity and up to 10% in equities with a market capitalization below USD 1 billion.
The Fund will also invest in government or Investment grade corporate issuer debt securities, money market instruments and cash deposits.

The Fund is allowed to invest without limits in currencies other than its base currency (USD). These investments may or may not be hedged at the Investment Manager's discretion.

The Fund is not managed in reference to a benchmark.

The Fund may also make use of financial derivatives instruments for efficient portfolio management and hedging purposes.
Derivative instruments include, but are not limited to: Contracts for Differences (CFD), equity swaps, basket swaps, FX forwards and/or Total Return Swaps (TRS).
TRS are used as an integral part of the investment policy and on a continuous basis, regardless of market conditions, mainly for implementing components of the investment strategy to enhance returns than can only be achieved through derivatives. TRS may also be used, to a lesser extent, for implementing elements of the investment strategy for efficient portfolio management techniques such as gaining cost efficient long exposure.
The current expected proportion of assets under management for this Fund that will be subject to TRS is of 0%.
The current maximum proportion of assets under management for this Fund that will be subject to TRS is of 200% (with long exposure 100% and short exposure 100%).

The Fund's base currency is USD.

Any income received by the Fund is reinvested (capitalisation share class).

INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with average knowledge of the underlying financial instruments and some financial industry experience. The Fund is compatible with investors who may bear capital losses and who do not need capital guarantee. The Fund is compatible with clients who wish to hold their investment over 3 years.

What are the risks and what could I get in return?

Risk indicator

1	2	**3**	4	5	6	7

Lower risk — **Higher risk**

The risk indicator assumes you keep the product for 3 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level. Poor market conditions are unlikely to impact the Fund's capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the prospectus for more information on the specific and material risks relevant to the Fund not included in the summary risk indicators.

This Fund does not include any protection from future market performance, so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: **Example investment:**		**3 years** **USD 10'000**		
		If you exit after 1 year	**If you exit after 3 years**	
Scenarios				
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**			
Stress scenario	**What you might get back after costs**	USD 6'970	USD 7'550	
	Average return each year	-30.3%	-8.9%	
Unfavourable scenario	**What you might get back after costs**	USD 8'680	USD 8'850	This type of scenario occurred for an investment in the product between May 2021 and June 2022.
	Average return each year	-13.2%	-4.0%	
Moderate scenario	**What you might get back after costs**	USD 10'140	USD 10'510	This type of scenario occurred for an investment in the proxy then the product between October 2018 and October 2021.
	Average return each year	1.4%	1.7%	
Favourable scenario	**What you might get back after costs**	USD 12'290	USD 13'780	This type of scenario occurred for an investment in the proxy between August 2012 and August 2015.
	Average return each year	22.9%	11.3%	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if the product is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with BNP Paribas S.A., Luxembourg Branch and are segregated from the assets of other sub-funds of the SICAV. The assets of the Fund cannot be used to pay the debts of other sub-funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10'000 is invested

Investment of USD 10'000	**If you exit after 1 year**	**If you exit after 3 years**
Total costs	USD 419	USD 709
Annual cost impact (*)	4.2%	2.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.9% before costs and 1.7% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	**Up to** 3.00% of the amount you pay in when entering this Investment.	**Up to** USD 300
Exit costs	There is no exit fee for this product.	USD 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.91% of the value of your investment per year. This is an estimate based on actual costs over the last year.	USD 91
Transaction costs	0.03% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 3
Incidental costs taken under specific conditions		
Performance fees	7.50% with a minimum return rate of 0.00%. See the section in the relevant appendix of the prospectus entitled "Performance Fee" for further details. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	USD 25

How long should I hold it and can I take my money out early?

Recommended Holding Period (RHP): 3 years.

The RHP was chosen to provide a consistent return less dependent on market fluctuations.

The Net Asset Value (NAV) is weekly, dated each Friday being a full bank business day in Luxembourg or in the United States or in the United Kingdom or in Japan (each a Business Day). In other cases, the NAV will be set on the next Business Day. The NAV is calculated the following full bank business day in Luxembourg (Calculation Day). Redemptions are possible on each NAV date as described above. All redemption requests must be received in good order by the registrar and transfer agent prior to 13:00 (Luxembourg time) two (2) Business Days prior to the NAV Date. Redemption proceeds shall be paid within two (2) Business Days following the NAV Date.

Details of the closing days are available here: https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa.
