

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

UBAM - Europe Equity, a sub-fund of UBAM

Class: AC EUR (Capitalisation) LU0045842449

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow capital and generate income primarily by investing in equities issued, for at least 75% of its net assets, in companies having their registered office in the European Union, in the United Kingdom and/or European Economic Area.

The Fund is actively managed and relatively concentrated, investing mainly in securities denominated in Euros.

The Fund invests in stocks that we believe are attractively valued and will rise in value over the long term. These stocks may benefit from particular investments themes such as exports to rapidly-developing emerging markets.

The Fund aims to outperform the MSCI Europe Net Return Index (the "Benchmark").

This Benchmark is representative of the investment universe and of the risk profile of the Fund.

Although the Fund's securities will primarily correspond to those of the Benchmark, the portfolio's investments can deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

The Fund's value is calculated and expressed in Euros.

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg.

Details of the closing days are available here:

<https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

The recommended holding period is minimum five years.

As an equity fund, its holdings can move in line with or return less than the broad stock market, so investors should be aware that the value of their holdings could fall and that they may not get back their initial investment.

Any income received by the Fund is reinvested (capitalisation share class).

Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk category 6 reflects a very high potential gain and/or loss in the value of the portfolio.

This is due to investments in equities on the European market.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

Currency risk: The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

| | |
|--------------|-------|
| Entry charge | 3.00% |
| Exit charge | None |

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.
