Global private debt across the capital structure with unique liquidity features

ABOUT THE FUND

The dual management of the portfolio, Partners Group for private debt and UBP for liquid public debt, enables investors to access Partners Group's global platform for sourcing private debt transactions and UBP's expertise in managing high liquidity income strategies.

The Fund offers a unique liquidity feature. The strategy is more nimble than a similar stand-alone private debt portfolio with respect to managing inflows and outflows thanks to the liquid fixed income allocation managed by UBP.

The Fund can invest across private debt segments: senior loans 1st and 2nd lien, mezzanine debt, real estate and infrastructure debt.

PERFORMANCE EVOLUTION CHF (NET OF FEES)

Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise.

SPECIFIC RISKS

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Counterparty risk: As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

The Sub-Fund will invest a substantial part of its assets private debt funds with lower liquidity terms than public fixed income funds.

Private debt funds may experience lower liquidity terms than their official fund NAV frequency in consideration of the illiquidity of the underlying assets as well as corresponding gating restrictions. Any imposition of gating restrictions in private debt funds invested will reduce the liquidity of the Sub-Fund.

Please see the Prospectus for additional information.

Currency risk: The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

PERFORMANCE HISTORY CHF (NET OF FEES)

	March 2024	YTD	2023	2022	2021	2020	2019
UBP PG - ACTIVE INCOME	0.61 %	1.57 %	5.65 %	-4.57 %	4.76 %	-4.94 %	4.59 %
	3 months	6 months	1 year	3 years	5 years	10 Years	Since inception
UBP PG - ACTIVE INCOME	1.57 %	4.14 %	6.48 %	6.54 %	4.95 %		8.30 %

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

GLOSSARY

Yield

The yield is the income return on an investment, such as the interest or dividends received from holding a particular security. The yield is usually expressed as an annual percentage rate based on the investment's cost, current market value or face value.

Derivatives

Derivatives are financial instruments whose prices depend on the price movements in a reference variable, known as the underlying. Underlying assets may be shares, equity indices, government bonds, currencies, interest rates, commodities like wheat and gold, or also swaps. Derivative financial instruments may be unconditional forward transactions or they may be options. They are traded either on futures and options exchanges on standardised terms, or over-the-counter (OTC) on freely negotiated terms. Changes in the price of the underlying lead in certain situations to considerably higher price fluctuations in the derivative. Derivatives can be used to hedge against financial risks, to speculate on price changes (trading) or to take advantage of price differences between markets (arbitrage).

Duration

Duration is the average time to payout. This key figure is used to measure the influence of interest rate movements on the price of a bond or bond fund. Duration is defined in years (e. g. 3-year duration means that the value of a bond would increase by 3% if interest rates fall by 1% and vice versa).

High-yield bond

Bonds with high interest rates and high risk exposure. The issuers of such securities are

often companies with a low credit rating.

High-yield fund

A fund for high-yield bonds (i.e. bonds with low credit ratings).

Investment grade

A rating provides information about the creditworthiness of a debtor. The higher the rating, the less likely the debtor is to default. A distinction is made between high-quality (investment grade) and speculative bonds (high-yield or junk bonds). For investment-grade bonds, Standard & Poor's issues ratings from AAA to BBB, while Moody's ratings range from Aaa to Baa.

Credit default swap (CDS)

A credit default swap (CDS) is a kind of insurance against the risk of credit default. Upon conclusion of a credit default swap agreement, the protection seller pledges himself to pay compensation to the protection buyer if a specified credit event occurs (eg default or late payment). In return, the protection seller receives a premium. The amount of the CDS premium depends primarily on the creditworthiness of the reference debtor, the definition of the credit event and the maturity of the contract.

Private Debt

Private Debt is a form of financing of companies and assets (e.g. infrastructure or real estate). Private Debt typically involves direct lending to corporates (as opposed to via public markets or via bank syndication) and lending to Leveraged Buyout (LBO) companies.

Private Debt Funds: When investing in Private debt funds, there is no assurance that the liquidity of the investments of such UCIs will always be sufficient to meet redemption requests as and when made. Any lack of liquidity may affect the liquidity of the shares of the Fund and the value of its investments. Private market investments typically display uncertainties which do not exist to the same extent in other investments (e.g. listed securities). Further, private market investments are often illiquid long-term investments that do not display the liquidity or transparency characteristics often found in other investments (e.g. listed securities). Certain investments are valued on the basis of estimated prices and therefore subject to potentially greater pricing uncertainties than listed securities. In addition, private debt funds may not be able to sell their assets when it desires to do so or to realize what it perceives to be their fair value upon a sale. Investors should be aware that the portfolio of the Sub-Fund will be subject to high market risks and no assurance can be given that the investment objectives of this Sub-Fund will be achieved.

UBP PG - ACTIVE INCOME

Investors should carefully read the Fund and Sub-Fund's risk warnings IN PARTICULAR THE SPECIFIC RISKS CONVERNING PRIVATE DEBT MARKET stated in the prospectus before investing in the Sub-Fund.

This document may refer to the past performance of investment interests. Past performance is not a guide to current or future results. The value of investment interests can fall as well as rise. Any capital invested may be at risk and you may not get back some or all of your original capital. In addition, any performance data included in this document does not take into account fees and expenses charged on issuance and redemption of securities nor any taxes that may be levied. Changes in exchange rates may cause increases or decreases in your return.

All statements other than statements of historical fact in this document are 'forward-looking statements'. Forward-looking statements are not guarantees of future performance. The financial projections included in this document do not represent forecasts or budgets, but are purely illustrative examples based on a series of current expectations and assumptions which may not eventuate. The actual performance, results, financial condition and prospects of an investment interest may differ materially from those expressed or implied by the forward-looking statements in this document as the projected or targeted returns are inherently subject to significant economic, market and other uncertainties that may adversely affect performance. UBP disclaims any obligation to update any forward-looking statement, as a result of new information, future events or otherwise.

It should not be construed as advice or any form of recommendation to purchase or sell any security or funds. It does not replace a prospectus or any other legal documents that can be obtained free of charge from the registered office of a fund or from UBP. The opinions herein do not take into account individual investors' circumstances, objectives, or needs. Each investor must make his/her own independent decision regarding any securities or financial instruments mentioned herein and should independently determine the merits or suitability of any investment. In addition, the tax treatment of any investment in the fund(s) mentioned herein depends on each individual investor's circumstances. Investors are invited to read carefully the risk warnings and the regulations set out in the prospectus or other legal documents and are advised to seek professional advice from their financial, legal and tax advisors.

The tax treatment of any investment in the Fund depends on your individual circumstances and may be subject to change in the future.

The document neither constitutes an offer nor a solicitation to buy, subscribe for or sell any currency, funds, product or financial instrument, make any investment, or participate in any particular trading strategy in any jurisdiction where such an offer or solicitation would not be authorised, or to any person to whom it would be unlawful to make such an offer or invitation.

Telephone calls to the telephone number stated in this presentation may be recorded. When calling this number, UBP will assume that you consent to this recording.

UBP is authorised and regulated in Switzerland by the Swiss Financial Market Supervisory Authority and is authorised in the United Kingdom by the Prudential Regulation Authority. UBP is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority.

The Swiss paying agent of UBP PG is Banque Cantonale de Genève, 17, quai de l'Île, 1204 Geneva and its Swiss representative is Union Bancaire Privée, UBP SA, 96-98 rue du Rhône, P.O. Box 1320, 1211 Geneva 1. The prospectus, articles of association, annual and semi-annual reports may be obtained free of charge from the Swiss representative and from UBP Asset Management (Europe) S.A., 287-289, route d'Arlon, L-1150 Luxembourg. In respect of the units distributed in and from Switzerland, the place of performance and jurisdiction is the registered office of the Swiss representative.

Past performance is not a guide to current or future results. The performance data do not take into account fees and expenses charged on issuance and redemption of the shares nor any taxes that may be levied. Changes in exchange rates may cause the NAV per Share in the investor's base currency to go up or down.
