SPECIFIC RISKS

- Emerging market risk: The Fund invests in overseas markets which carry a higher risk than investing in larger established markets. Investments in emerging markets are likely to experience greater rises and falls in value. Emerging markets are also more likely to experience political and/or legal uncertainty and investments held in these countries may not have the same protection as those held in more developed countries. The Fund may invest via the Shanghai Hong Kong Stock Connect (HKSC). It means that the Fund will be subject to rules and regulations issued/amended by HKSC particularly about quota limitation and trading suspension. When using the HKSC the Fund will be subject to operational risk, clearing settlement and custody risk.
- Regulatory risk: The Stock Connect is novel in nature, and is subject to regulations that are not tested so far and there is no certainty as to how they will be applied. Moreover, the current regulations are subject to change.
- Full details of risks are disclosed in the chapter 'Risk Factors' in the prospectus.

ABOUT THE FUND

The Fund seeks to grow your capital and generate income primarily by investing in equities of companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office or (iv) listed on qualified exchanges of Regulated Markets or (v) primarily operate or (vi) have a majority of their income, profits, assets, production activities or other commercial interests, in emerging countries. These countries include, but are not limited to, the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Greece, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Saudi Arabia, Ukraine, Malaysia, Croatia and Russia. For investments in China, the Fund may invest up to 25% of its net assets in China A-Shares through the Shanghai-Hong Kong Stock Connect.

It is an actively managed, well diversified portfolio of stocks invested in several currencies. The Fund's performance can therefore be affected by fluctuations in those currencies against the US Dollar.

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

GLOSSARY
Benchmark

Index used as basis for measuring the performance of an investment fund. Also called reference index or comparison index.

Derivatives

Derivatives are financial instruments whose prices depend on the price movements in a reference variable, known as the underlying. Underlying assets may be shares, equity indices, government bonds, currencies, interest rates, commodities like wheat and gold, or also swaps. Derivative financial instruments may be unconditional forward transactions or they may be options. They are traded either on futures and options exchanges on standardised terms, or over-the-counter (OTC) on freely negotiated terms. Changes in the price of the underlying lead in certain situations to considerably higher price fluctuations in the derivative. Derivatives can be used to hedge against financial risks, to speculate on price changes (trading) or to take advantage of price differences between markets (arbitrage).
