What is this product?

TYPE OF PRODUCT

The Fund is a sub-fund of UBAM, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide on its pure and simple liquidation if its net assets represent less than EUR 10 million (or equivalent value in another currency) or if the economic and/or political environment was to change or for any economic and financial reasons for which the Board of Directors considers that it is in the general best interests of shareholders to liquidate the Fund.

OBJECTIVES

The Fund seeks to grow capital and generate income by investing primarily in Emerging countries corporate bonds.

The Fund is actively managed and invests in relatively high-quality bonds with a minimum credit rating of BBB- (S&P or Fitch) or Baa3 (Moody's). As an exception to this rule, the Fund may invest up to 15% of its net assets in non-rated products/issuers.

The Fund will invest at least 80% in the currencies of OECD countries. The currency risk against USD will be largely hedged.

The Fund uses the JP Morgan Corporate Emerging Markets Bond Diversified Index Investment Grade (the "Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Fund although the Investment Manager has significant discretion to deviate from its securities and weighting.

The Fund may invest its net assets up to:

- 100% in Emerging countries

This exposure can be increased up to 120% through derivatives

- 20% in Contingent Convertible bonds (CoCos).

The Fund's base currency is USD.

The share currency risk in relation to the Fund's base currency is mainly hedged.

Any income received by the Fund is distributed (distribution share class).

INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with average knowledge of the underlying financial instruments and some financial industry experience. The Fund is compatible with investors who may bear capital losses and who do not need capital guarantee. The Fund is compatible with clients who wish to hold their investment over 3 years.

OTHER INFORMATION

The depositary is BNP Paribas S.A., Luxembourg Branch.

The registrar and transfer agent is Caceis Bank, Luxembourg Branch.

Further information about the Fund (including the prospectus, latest annual and semi-annual reports, latest NAVs) are available free of charge on www.ubp.com or by making a written request to the registered office of the product manufacturer.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		3 years EUR 10'000		
		If you exit after 1 year	If you exit after 3 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

Unfavourable scenario	What you might get back after costs	EUR 8'090	EUR 8'000	This type of scenario occurred for an investment in the product between December 2020 and June 2022.
	Average return each year	-19.1%	-7.2%	
Moderate scenario	What you might get back after costs	EUR 9'800	EUR 9'970	This type of scenario occurred for an investment in the product between September 2017 and September 2020.
	Average return each year	-2.0%	-0.1%	
Favourable scenario	What you might get back after costs	EUR 10'810	EUR 11'010	This type of scenario occurred for an investment in the product between August 2013 and August 2016.
	Average return each year	8.1%	3.3%	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if the product is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with BNP Paribas S.A., Luxembourg Branch and are segregated from the assets of other sub-funds of the SICAV. The assets of the Fund cannot be used to pay the debts of other sub-funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10'000 is invested

Investment of EUR 10'000	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 463	EUR 819
Annual cost impact (*)	4.6%	2.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.6% before costs and -0.1% after costs.

Composition of costs
