UBAM – EUROPE SUSTAINABLE SMALL CAP EQUITY

Focus on long-term capital growth of small- and mid-cap companies

The fund aims to provide long-term capital growth through a diversified portfolio of investments in small and mid-sized pan-European companies.

Key points

- *Diversified portfolio of small and mid-sized European companies*
- *Focus on well-financed, high-quality companies which deliver sustainable growth over the long term*
- *Use the inherent inefficiencies of small- and mid-cap companies to our advantage*
- *Invest with a long-term investment horizon*
- *Avoid the low-returning, badly-managed “graveyard” companies*

Investment case

There are ongoing signs of recovery in a number of European economies and European equity valuations look attractive relative to other asset classes. The small- and mid-cap playing field in Europe is an under-covered and poorly-researched area of the market compared to large caps. Smaller companies have historically provided strong returns to investors over the long term, despite the reverse survivorship bias of the best companies leaving the universe. Higher levels of innovation and a smaller base effect than larger companies also provide a good foundation for higher rates of growth. Moreover, smaller companies often operate in niche areas of the market which tend to fly under the radar of many larger companies and hence offer the prospect of extended periods of competitive advantage. Last but not least, the selective small-cap investor stands a good chance of being able to avoid the worst companies (so-called “graveyard” stocks) and focus on companies that are well positioned to become bigger in the future.

Fund concept

The prime focus of the fund is to invest in strongly-financed, well-managed, competitive, small- and mid-sized companies which demonstrate a strong ability to sustain attractive returns on capital and which the manager believes have good prospects to grow bigger companies during the investment time horizon.

The manager will invest in between 40 and 60 companies, ensuring that each holding is of material size within the portfolio but providing sufficient diversification benefits at this end of the market-capitalisation spectrum.
