

For Swiss qualified investors only

UBAM (CH) - HIGH GRADE CHF INCOME

Optimising income in CHF within the medium-dated investment-grade space

UBAM (CH) - High Grade CHF Income offers Swiss investors the benefit of an attractive income in Swiss francs while maintaining similar risk characteristics as the SBI AAA-BBB 1–10 year index.

Key points

- *Attractive income in CHF while maintaining similar risk characteristics as the Swiss bond market (SBI AAA-BBB 1–10-year index)*
- *Investment-grade portfolio with a typical maturity of 5 years and no economic leverage*
- *Top-down macroeconomic-driven process to actively manage the interest rate and credit exposure*
- *Use of standardised and cleared interest rate and credit derivatives*
- *Experienced investment professionals with expertise in Swiss bond and derivative markets*
- *No stamp duty for Swiss investors and dedicated share classes for pension funds*

Investment case

Swiss fixed income investors with the Swiss franc (CHF) as their base currency can either invest in CHF bonds issued by Swiss or foreign entities or in EUR and USD bonds with currency hedging to the CHF. This second solution could generate a yield pick-up with a similar economic risk.

With CHF bond yields at or below zero and the high cost of hedging to the CHF, UBAM (CH) - High Grade CHF Income allows Swiss investors to optimise expected returns in CHF by accessing further fixed income opportunities while maintaining a similar risk profile to that of a typical Swiss bond portfolio: investment-grade ratings and moderate interest rate risk.

Fund concept

UBAM (CH) - High Grade CHF Income offers Swiss investors the benefit of an attractive income in CHF while maintaining similar risk characteristics as the Swiss investment-grade fixed income market, with moderate interest rate risk, as expressed by the SBI AAA-BBB 1–10-year index.

The fund only invests in investment-grade securities with a typical average maturity of 5 years and selects the most attractive segment among:

1. CHF-denominated bonds
2. EUR- or USD-denominated bonds hedged to the CHF
3. A CHF fixed income portfolio built with standardised and cleared interest rate and credit derivatives.

Asset allocation based on relative value opportunities across 3 segments

Fixed income segments

1. CHF-denominated bonds
2. EUR or USD hedged into CHF
3. Interest rate futures and CDS index

Investment process

- Three dimensions: top-down relative value across segments, top-down and macro-driven investment views, and bottom-up selection (only when bonds' top-down relative value is appealing):
 - Top-down relative value across segments determines the fixed income allocation
 - Top-down macroeconomic views determine interest rate, credit and geographic exposure
 - Bottom-up credit research and relative value analysis applies when cash bond segments are offering the most attractive expected returns
- Risk-management is carried out throughout the investment process with real-time monitoring of positions

Investment guidelines

- Maximum total economic exposure: 100%
- Initial investment in investment-grade securities only
- Typical average maturity: 5 years
- Use of standardised and cleared derivatives for interest rates and credit

Investment team

- Thirteen-strong team overseeing CHF 19.4 billion worth of fixed-income assets as at 31 December 2019.
- Led by Philippe Gräub, who has twenty years' financial markets experience of which thirteen years managing and growing the UBP Global and Absolute Return Fixed Income franchise.
