UNION BANCAIRE PRIVÉE

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

UBAM - EM Sustainable Corporate Bond, a sub-fund of UBAM

Class: AHD EUR (Distribution) LU1668157628

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow capital and generate income primarily by investing in bonds whose issuer is a company domiciled in Emerging countries, has an underlying instrument directly or indirectly linked to Emerging countries or is a company whose risks are directly or indirectly linked to Emerging countries.

The Fund is actively managed and well diversified, investing mainly in currencies of OECD countries. The foreign exchange risk against US Dollars will be largely hedged.

The Fund invests in bonds with a minimum credit rating of B- (Fitch, Standard & Poor's) or B3 (Moody's) and, as an exception to this rule : up to 15% of the net assets in bonds with a rating below B- (Fitch or S&P) or B3 (Moody's), and up to 15 % of the net assets can be invested in nonrated bonds.
The investment strategy relies on credit and macroeconomic assessment, ESG analysis as well as on relative value in order to combine a financial risk-adjusted performance in line or above that of the EM corporate bond market over the investment horizon, with environmental and social characteristics better than that of JP Morgan Corporate EMBI Diversified Index ("the Benchmark"). The Fund also promotes a lower carbon footprint well below that of its Benchmark. The Fund invests for at least 95% in bonds with a minimum BB ESG rating from MSCI ESG Research and do not carry a Red controversy flag by MSCI ESG Research and up to 5% in bonds without ESG rating where the analysis is done by the Investment Manager.

The investment process includes a first phase of investment universe filtering and a second phase of ESG bottom-up research. The first phase consists in selecting issuers with sound ESG quality and avoids controversial business activities as well as companies in breach of international norms (norms-based screening). Then, the Investment Manager applies the second phase by integrating ESG consideration into its analysis and portfolio construction.

ESG considerations may include among other things carbon footprint as well as human rights and global norms compliance.

The Fund aims to outperform the Benchmark. The Benchmark is representative of the investment universe but not representative of the risk profile of the Fund. The portfolio's investments may deviate materially from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to align the portfolio with the environmental and/or social characteristics promoted by the Fund and/or in order to take advantage of specific investment opportunities.

The Fund may invest up to:
- 100% of its net assets in High yield
- 100% of its net assets in Emerging countires
this exposure can be increased up to 120% through derivatives
- 20% of its net assets in Contingent Convertible capital bonds (CoCos).

The Fund's value is calculated and expressed in US Dollars.
The currency risk in relation to the base currency USD is mainly hedged.

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg.
Details of the closing days are available here:
https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa.
The recommended holding period is minimum three years.

Any income received by the Fund is distributed (distribution share class).

Risk and reward profile

With lower risk, **With higher risk,**

potentially lower rewards **potentially higher rewards**

1	2	**3**	4	5	6	7

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 3 reflects limited potential gain and/or loss in the value of the portfolio.

This is due to investments in fixed income securities on Emerging countries.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail to honor its contractual obligations. This may result in a financial loss for the Fund.

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Currency risk: The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Emerging country risk: The Fund invests in developing overseas countries which carry a higher risk than investing in larger established countries. Investments in Emerging countries are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in Emerging countries rather than more developed countries may encounter difficulties when buying and selling investments. Emerging countries are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

ESG and Sustainability risk: it may result in a material negative impact on the value of an investment and performance of the Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on data which is difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate. All or part of said data may come/originate from third parties.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the Fund over a year	
Ongoing charges	1.93%

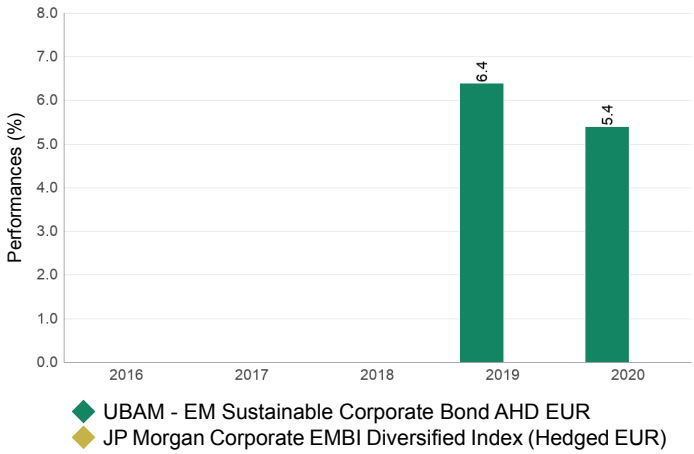
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower. Your financial advisor or distributor can inform you of the associated entry and exit charges.

The indicated ongoing charges are an estimate based on the expected total amount of charges. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another fund.

For more information about Fund charges, please refer to the relevant sections of the prospectus, which is available at www.ubp.com.

Past performance



The performance figures shown in the bar chart are not a reliable indication of future performance.

Annualised performance is calculated after deducting all charges taken from the Fund.

Fund creation date: 28/02/2018
Share class launch date: 28/02/2018

Share class currency: EUR
