

For Qualified Investors in Switzerland, or Professional Investors or Eligible Counterparties as defined by the relevant laws

## UBAM – HYBRID BOND

### Exposure to Additional Tier 1 debt (“CoCo” bonds)<sup>1</sup>

Actively managed portfolio investing in subordinated debt issued by financial and non-financial issuers. The key focus is on Additional Tier 1 debt (AT1 – “CoCo” bonds) issued by systemic European banks.

#### Key points

- *Diversified exposure to an actively managed portfolio of higher-yielding bonds*
- *Subordinated debt from financial and non-financial issuers with robust metrics based on the team’s fundamental credit research*
- *AT1 bonds: focus on systemic banks with extra regulatory capital requirements*
- *Specific tools developed by the team to analyse the AT1 market: a valuation method, stress tests and a terms & conditions analysis database*

#### Investment case

UBAM - Hybrid Bond provides exposure to higher-yielding subordinated debt instruments – including up to 100% AT1 debt – issued by financial and non-financial issuers, and may also:

- Provide diversification for high-yield bond portfolios;
- Supplement an equity portfolio, as subordinated debt ranks lower than senior debt but higher than equities in terms of seniority in a balance sheet<sup>2</sup>.

The focus of the portfolio is on issuers with robust metrics, as identified through the team’s fundamental credit research. For the AT1 market, the focus will be on national champions and systemic banks with extra regulatory capital requirements. The depth of the investment universe allows for active management of the allocation across regions, sectors, issuers and tranches of the capital structure.

#### Fund concept

UBAM - Hybrid Bond enables investors to gain diversified exposure to an actively managed portfolio of higher-yielding bonds: Additional Tier 1, bank Tier 2, insurance subordinated debt, and non-financial hybrid debt.

Subordinated debt issued by financial and non-financial issuers is a core expertise of UBP’s Global & Absolute Return Fixed Income team with more than USD 3 billion worth of assets with exposure to subordinated debt raised since 2012 (new money at the launch of the portfolios) and a track record of investing in this asset class since 2007.

In addition to its fundamental analysis, the team has developed specific tools to analyse the AT1 market: a valuation method, stress tests and a terms & conditions analysis database.

#### Performance of AT1 and European bank equities

<i>Data is hedged to USD</i>	AT1 (IG and HY)	MSCI Europe Bank
Annualised total return	9.2%	1.7%
Maximum drawdown	-11.4%	-43.8%

<sup>1</sup>Additional Tier 1 debt (“Contingent Convertible” or “CoCo” bonds) is a debt instrument that must transform into equities or be written off upon a triggering event. A CoCo bond, in the same way as other hybrid securities, has both debt- and equity-like features embedded within its structure. CoCo bonds are complex financial instruments and are not suitable or appropriate for all investors. In some jurisdictions, regulatory authorities have adopted laws or regulations, or published guidance with respect to the offering or sale of securities such as CoCo bonds to retail investors.  
<sup>2</sup>Capital structure inversion risk – see Risks section.

Source: Bloomberg Finance L.P. ICE BofAML index (COCL: includes IG and HY CoCos) from 31.12.2013 (inception) to 31.12.2019.  
Past performance is not a guide for current or futures results.  
Subordinated debt bears a risk of capital structure inversion: please refer to the Risks section.  
The Fund is actively managed and well diversified.  
The Fund is not managed in reference to a benchmark.

## Investment guidelines

- Exposure to AT1: up to 100%
- Exposure to subordinated debt from financial and non-financial issuers: up to 100%
- Non-investment-grade exposure: up to 100%
- Minimum rating: B-

## Investment team

- Fourteen-strong team overseeing CHF 19.4 billion worth of fixed income assets as at 31 December 2019
- Co-managers Christel Rendu de Lint and Philippe Gräub have been investing in the subordinated debt market (financial and non-financial) for more than fifteen years

## Investment process

## SRRI

The SRRI (Synthetic Risk and Reward Indicator) relates to the IC USD share class LU1861452677 as of 19.02.2020 and may differ for other share classes of the same fund.

This indicator represents the fund's annual historical volatility. The level assigned reflects the risk/return profile: 1: lowest; 2: low; 3: limited; 4: average/moderate; 5: high; 6: very high; 7: highest.

Historical data such as that used to calculate the SRRI cannot be considered a reliable indication of the fund's future risk profile. The risk category associated with the fund is not guaranteed and may change over time.

The information contained herein is subject to change without prior notice. UBP gives no undertaking to update this document or to correct any inaccuracies in it which may become apparent. This document may refer to the past performance of investment interests. Past performance is not a guide to current or future results. The value of investment interests can fall as well as rise. Any capital invested may be at risk and investors may not get back some or all of their original capital. Any performance data included in this document does not take into account fees, commissions, and expenses charged on issuance and redemption of securities, nor any taxes that may be levied. Changes in exchange rates may cause increases or decreases in investors' returns. All statements other than statements of historical fact in this document are "forward-looking statements". Forward-looking statements do not guarantee future performances. The financial projections included in this document do not represent forecasts or budgets, but are purely illustrative examples based on a series of current expectations and assumptions which may not eventuate. The actual performance, results, financial condition and prospects of an investment interest may differ materially from those expressed or implied by the forward-looking statements in this document as the projected or targeted returns are inherently subject to significant economic, market and other uncertainties that may adversely affect performance. UBP also disclaims any obligation to update forward-looking statements, as a result of new information, future events or otherwise. None of the contents of this document should be construed as advice or any form of recommendation to purchase or sell any securities or funds. This document does not replace a prospectus or any other legal documents, which can be obtained free of charge from the registered office of the fund they relate to, or from UBP. The opinions herein do not take into account individual investors' circumstances, objectives, or needs. Each investor must make his/her own independent decision regarding any securities or financial instruments mentioned herein and should independently determine the merits or suitability of any investment. In addition, the tax treatment of any investment in the fund(s) mentioned herein depends on each individual investor's circumstances and may be subject to change in the future. Investors are invited to carefully read the risk warnings and the regulations set out in the prospectus or other legal documents and to seek professional financial, legal and tax advice. This document should not be deemed an offer nor a solicitation to buy, subscribe to, or sell any currency, funds, products, or financial instruments, to make any investment, or to participate in any particular trading strategy in any jurisdiction where such an offer or solicitation would not be authorised, or to any person to whom it would be unlawful to make such an offer or solicitation. Telephone calls to the telephone number stated in this document may be recorded. UBP will assume that by calling this number you consent to such recording. UBP is authorised and regulated in Switzerland by the Swiss Financial Market Supervisory Authority and is authorised in the United Kingdom by the Prudential Regulation Authority. UBP is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Any subscriptions not based on the funds' latest prospectuses, KIIDs, annual or semi-annual reports or other relevant legal document shall not be acceptable. The latest prospectus, articles of association, KIID and annual and semi-annual reports of the funds presented herein (the "Funds' Legal Documents") may be obtained free of charge from Union Bancaire Privée, UBP SA, 96-98 rue du Rhône, P.O. Box 1320, 1211 Geneva 1 ("UBP"). The Funds' Legal Documents may also be obtained free of charge from UBP Asset Management (Europe) S.A., 287-289 route d'Arion, 1150 Luxembourg, Grand Duchy of Luxembourg, and from Union Bancaire Gestion Institutionnelle (France) SAS, 116 avenue des Champs-Élysées, 75008 Paris, France. The Swiss representative and paying agent of the foreign funds mentioned herein is UBP. The Funds' Legal Documents may be obtained free of charge from UBP, as indicated above.

This sub-fund is suitable for investors who need a well-diversified contingent convertible bond allocation in their portfolio. Investors should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- **Risk of loss of principal investment:** CoCos are issued for regulatory capital adequacy purposes with the intention and purpose of being eligible as either Additional Tier 1 or Tier 2 capital. Such eligibility depends on a number of conditions, which, in particular, require the securities and the proceeds of their issue to be available to absorb any losses incurred by their issuers. The loss absorption is provided for through the triggering of principal equity conversion or principal write-down (whole or partial) if the issuer's capital ratio falls below a pre-specified threshold. There is also a possibility of such conversion or (write-down) upon regulatory intervention, which can happen even if the capital ratio is still above the pre-specified threshold. As a consequence of such a reduction to the outstanding principal, holders of securities may lose all or some of their investment.
- **Trigger risk:** Trigger activation occurs (i) if the issuer falls below pre-determined capital ratio thresholds or (ii) at the request of a financial regulator with supervisory authority, causing CoCos to convert into equity or to be permanently written down. In the first case, the trigger event calculations may also be affected by changes in applicable accounting rules, the accounting policies of the issuer or its group, and the application of these policies. In the event of a security being converted into equity, investors may suffer a loss depending on the conversion rate. Were the securities to be written down, the principal may be entirely lost with no payment recovered. Some CoCos may be written back up to par over time, but the issuer may be under no obligation to fully do so. Following a trigger event, losses may not reflect the waterfall of subordination and in some circumstances CoCo bond holders may suffer losses prior to investors in the same financial institution holding equity or bonds ranking pari passu, or junior to the CoCo instruments. In the second trigger case, a financial regulator with supervisory authority may at any time deem the issuer to have reached a point of non-viability, meaning that public intervention would be needed to keep the issuer out of bankruptcy, causing losses across the capital structure for equity and bond holders alike. Under these circumstances CoCo bond holders would suffer losses in line with the subordination of the CoCo host instrument.
- **Coupon cancellation risk:** CoCos issued in Additional Tier 1 format give the issuer an option to cancel any payment of interest at any time and at its sole discretion. In addition, the issuer may be required by the regulator to cancel upcoming interest payments. Coupon cancellation shall also be applicable if the issuer breaches a certain capital ratio threshold. Any cancellation of interest represents a forgone coupon payment and will not be reimbursed, should the issuer decide to resume interest payments at a later stage.
- **Extension risk:** As there may be no incentive, in the form of a coupon step-up, for the issuer to redeem the securities issued, this would cause the securities' duration to lengthen and expose investors to higher interest rate risk.
- **Capital structure inversion risk:** Contrary to conventional capital hierarchy, CoCo investors may suffer a loss of capital where equity holders do not. In certain scenarios, holders of CoCos will suffer losses ahead of equity holders, e.g. when a high-trigger principal write-down on a CoCo is activated. This goes against the normal order of capital structure hierarchy where equity holders are expected to suffer the first loss. It is less likely with a low-trigger CoCo where equity holders will already have suffered losses. Moreover, high-trigger Tier 2 CoCos may suffer losses not at the point of gone concern but conceivably in advance of lower-trigger Additional Tier 1 instruments and equity.

Cocos tend to have higher price volatility and greater liquidity risk than other securities which do not expose investors to the aforementioned risks.
