SPECIFIC RISKS

- Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.
- Counterparty risk:** The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail to honor its contractual obligations. This may result in a financial loss for the Fund.
- Credit risk:** The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

ABOUT THE FUND

The Fund seeks to grow capital and generate income primarily by investing in high yield markets via the use of Credit Default Swaps ("CDS").

The Fund is actively managed and well diversified. It is composed of CDS for credit exposure and high quality sovereign, supranational and agency debt securities denominated in Euros for interest rate exposure.

The Fund is not managed in reference to a benchmark.

The Fund can adjust its overall high yield exposure from 80% to 120%.

It can vary its interest rate exposure.

High yield bonds are issued by entities whose activity is more sensitive to the economic cycle and therefore pay a higher interest rate than investment grade bonds to compensate for the increased risk.

Exposure to high yield bonds is implemented via cleared and diversified high yield CDS indices. CDS indices offer a liquid exposure to high yield and bear minimal interest rate risk.

PERFORMANCE EVOLUTION EUR (NET OF FEES)

Performance over 5 years or since inception. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise.

PERFORMANCE HISTORY EUR (NET OF FEES)

	YTD	2019				
	September 2020	3 months	1 year	3 years	5 years	Since inception
UBAM - EURO HIGH YIELD SOLUTION	-3.98 %					2.57 %
UBAM - EURO HIGH YIELD SOLUTION	-2.63 %	0.22 %	-2.75 %			-1.51 %

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

GLOSSARY

Benchmark

Index used as basis for measuring the performance of an investment fund. Also called reference index or comparison index.

Derivatives

Derivatives are financial instruments whose prices depend on the price movements in a reference variable, known as the underlying. Underlying assets may be shares, equity indices, government bonds, currencies, interest rates, commodities like wheat and gold, or also swaps. Derivative financial instruments may be unconditional forward transactions or they may be options. They are traded either on futures and options exchanges on standardised terms, or over-the-counter (OTC) on freely negotiated terms. Changes in the price of the underlying lead in certain situations to considerably higher price fluctuations in the derivative. Derivatives can be used to hedge against financial risks, to speculate on price changes (trading) or to take advantage of price differences between markets (arbitrage).

Duration

Duration is the average time to payout. This key figure is used to measure the influence of interest rate movements on the price of a bond or bond fund. Duration is defined in years (e.g. 3-year duration means that the value of a bond would increase by 3% if interest rates fall by 1% and vice versa).

High-yield bond

Bonds with high interest rates and high risk exposure. The issuers of such securities are often companies with a low credit rating.

High-yield fund

A fund for high-yield bonds (i.e. bonds with low credit ratings).

Investment grade

A rating provides information about the creditworthiness of a debtor. The higher the rating, the less likely the debtor is to default. A distinction is made between high-quality (investment grade) and speculative bonds (high-yield or junk bonds). For investment-grade bonds, Standard & Poor's issues ratings from AAA to BBB, while Moody's ratings range from Aaa to Baa.

Credit default swap (CDS)

A credit default swap (CDS) is a kind of insurance against the risk of credit default. Upon conclusion of a credit default swap agreement, the protection seller pledges himself to pay compensation to the protection buyer if a specified credit event occurs (eg default or late payment). In return, the protection seller receives a premium. The amount of the CDS premium depends primarily on the creditworthiness of the reference debtor, the definition of the credit event and the maturity of the contract.

THIS IS A MARKETING DOCUMENT. It reflects the opinion of Union Bancaire Privée, UBP SA or any entity of the UBP Group (hereinafter "UBP") as of the date of issue. It is not intended for distribution, publication, or use in any jurisdiction where such distribution, publication, or use would be unlawful, nor is it directed at any person or entity at which it would be unlawful to direct such a document.

This document has been made on a best-effort basis, is furnished for information purposes only and does not constitute an offer or a recommendation to purchase or sell any security, unless otherwise provided for in the present disclaimer. The opinions herein do not take into account individual investors' circumstances, objectives, or needs. Each investor must make his own independent decisions regarding any securities or financial instruments mentioned herein. Before entering into any transaction, each investor is urged to consider the suitability of the transaction in relation to his particular circumstances and to independently review, with professional advisors as necessary, the specific risks incurred, in particular at financial, regulatory and tax levels. The information and analysis contained herein has been based on sources believed to be reliable.
