What is this product?

TYPE OF PRODUCT

The Fund is a sub-fund of U ASSET ALLOCATION, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide on its pure and simple liquidation if its net assets represent less than EUR 10 million (or equivalent value in another currency) or if the economic and/or political environment was to change or for any economic and financial reasons for which the Board of Directors considers that it is in the general best interests of shareholders to liquidate the Fund.

OBJECTIVES

The Fund seeks to generate a high level of capital gain across the investment horizon by investing directly or indirectly through funds.

The Fund is actively managed, without any restriction as to the country of the issuer including Emerging countries.

The Fund is allowed to invest in other currencies than its base currency (USD).

These investments may or may not be hedged at the Investment Manager's discretion.

However, the portfolio base currency exposure will range from 30% to 110%. The Fund's performance can therefore be affected by fluctuations in those currencies against the base currency.

SEA stands for:

Swiss equities as within the equity allocation, there is a 20% minimum bias towards Swiss equities.

Environmental, Social and Governance (ESG) considerations which are part of the investment and instrument selection process. Asset types are selected in a multi-level review process based on both positive and negative criteria (exclusion). ESG research is not limited to ESG ratings, but may also include business involvement screening, controversy screening and sustainable impact metrics.

Active, as the Fund is actively managed and features an active instruments selection.

The Fund is not managed with reference to a benchmark.

The Fund may invest up to:

- 100% in fixed income instruments
 - Including up to 10% in Contingent Convertible bonds (CoCos) and 10% of its net assets* in Asset Backed Securities (ABS), Mortgage Backed Securities (MBS), Catastrophe bonds (CAT bonds)
 - 100% in equity including 20% minimum in swiss equities
 - 50% in money market instruments
 - 35% in alternative investments
 - 20% in convertible bonds
- * indirectly, through funds only

The maximum of 50% in money market instruments will only be reached in exceptional market situations and for a limited period of time.

Direct or indirect investments in fixed income instruments or issuers with a rating below BBB- (S&P or Fitch) or Baa3 (Moody's) or no rating are allowed up to 40% of the total net assets of the Fund.

Financial derivatives such as but not limited to Credit Default Swaps (CDS), financial futures and options may be used for efficient portfolio management and/or for hedging purposes.

In addition, the Fund can invest in structured products which will be classified according to the nature of their underlyings for the calculation of the above limits.

The Fund's base currency is USD.

Any income received by the Fund is reinvested (capitalisation share class).

INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The Fund is compatible with investors who may bear capital losses and who do not need capital guarantee. The Fund is compatible with clients who wish to hold their investment over 5 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		5 years USD 10'000		
		If you exit after 1 year	If you exit after 5 years

What happens if the product is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with BNP Paribas S.A., Luxembourg Branch and are segregated from the assets of other sub-funds of the SICAV. The assets of the Fund cannot be used to pay the debts of other sub-funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10'000 is invested

Investment of USD 10'000	If you exit after 1 year	If you exit after 5 years
Total costs	USD 272	USD 1'744
Annual cost impact (*)	2.7%	2.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.7% before costs and 5.0% after costs.
