What is this product?

TYPE OF PRODUCT

The Fund is a sub-fund of U ACCESS (Ireland) UCITS P.L.C., an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as an open-ended umbrella investment company (the Company) with variable capital under the laws of Ireland.

TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide to close the Fund under certain circumstances.

OBJECTIVES

The Fund seeks to achieve superior risk adjusted returns by exploiting fundamental and technical valuation aberrations in the credit markets.

The Fund is actively managed and not with reference to a benchmark.

The Portfolio Manager will undertake fundamental and comparative research to identify securities to achieve its investment objective and will tend to invest in companies with changes in balance sheet leverage, operating margins, cash flow or market share.

The Fund may invest in fixed income type instruments such as U.S. and non-U.S. government debt, high yield, distressed and investment grade corporate debt and debt related instruments and convertible bonds. Such instruments may be fixed and/or floating rate, either rated or unrated with a minimum credit quality at the time of purchase of D as rated by S&P (or equivalent by another rating agency).

The Fund can invest in equity instruments (i.e. common stocks, preferred stocks, equity securities of Real Estate Investment Trusts (REITs), American Depositary Receipts (ADRs) and/or Global Depositary Receipts (GDRs)). However, exposure to equity securities is not expected to be significant.

The Fund may create synthetic short positions (i.e. equivalent to short positions but implemented synthetically through FDIs). Such positions may be used to benefit from falling prices. Long positions will be used to benefit from an upturn in prices. The Fund's portfolio may consist generally of 50 to 150 long positions and 50 to 150 short positions.

The Fund shall not exceed in aggregate 10% of its NAV in investments in eligible Collective Investment Schemes (CIS).

The Fund may gain exposure to financial indices compliant with the UCITS Regulations indirectly through the use of FDIs.

The Fund will invest in FDIs for investment, hedging and/or efficient portfolio management purposes. It may also invest in cash and/or money market instruments.

The Fund's base currency is USD.

The Fund is suitable for investors seeking a long-term investment who are willing to accept a high volatility due to the Fund's investment policy. Investors should note that holding a substantial proportion of their investment portfolio in the Fund may not be appropriate.

The share currency risk in relation to the Fund's base currency is mainly hedged.

Any income received by the Fund is reinvested.

INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with average knowledge of the underlying financial instruments and some financial industry experience. The Fund is compatible with investors who may bear capital losses and who do not need capital guarantee. The Fund is compatible with clients who wish to hold their investment over 3 years.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
