UBAM - Euro Corporate IG Solution, a sub-fund of UBAM

Class: IHC CHF (Capitalisation) LU1808451519

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to optimize income in Euro while maintaining similar risk characteristics as the Euro investment grade corporate bond market.

The Fund invests its net assets primarily in Credit Default Swaps ("CDS") for credit exposure and bonds and/or interest rate futures for interest rate exposure.

The overall portfolio will have a minimum modified duration of 2 years.
The net assets (excluding those used for the investment in derivatives) can be invested in term deposits with a maturity up to 12 months.

The Fund is actively managed and aims to outperform the ICE BofAML Euro Large Cap Corporate Index (the “Benchmark”).
This Benchmark is representative of the risk profile of the Fund in terms of interest rate duration and spread duration.
Although the Fund's risk profile will be similar to the Benchmark, the portfolio's investments are expected to deviate materially from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

The Fund's value is calculated and expressed in Euros.
The currency risk in relation to the base currency EUR is mainly hedged.

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg except days where the decisive market is closed: Eurex.

Details of the closing days are available here:
https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa.
The recommended holding period is minimum three years.

Any income received by the Fund is reinvested (capitalisation share class).

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 3 reflects limited potential gain and/or loss in the value of the portfolio.

This is due to investments in fixed income securities on the European market.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.
