

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

U ACCESS - Income Partners Asia High Yield 2022, a sub-fund of U ACCESS

Class: IHC CNH (Capitalisation) LU1997926446

U ACCESS is a SICAV managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow capital and generate income primarily by investing in Asian bonds.

The portfolio is made up of securities denominated only in US Dollars.

The Fund has a maturity date of 07 June 2022 unless the terms are changed before the maturity date.

Due to the maturity date, the portfolio turnover will be relatively low.

The Fund will invest in products with a minimum rating of B- (S&P or FITCH), B3 (Moody's) or an equivalent rating by another rating agency.

The Fund is not managed in reference to a benchmark.

The Fund may invest up to:

- 100% of its net assets in Emerging markets
- 100% of its net assets in High yield.

High yield bonds are issued by entities whose activity is more sensitive to the economic cycle and therefore pay a higher interest rate than investment grade bonds to compensate for the increased risk.

To achieve its aims the Fund invests in bonds issued by Asian markets governments and companies. Some of the issuers may be considered high-quality, with a low risk of defaulting on their interest payments, while other issuers are companies or governments that may be considered at higher risk.

For the last 12 months before the maturity date, the Asian geographical restrictions may be levied and, in addition, the Fund may hold up to 100% in cash or deposits (while respecting the risk spreading among counterparties) in order to prepare for the Fund's maturity date redemption.

The Fund's value is calculated and expressed in US Dollars.

The share currency risk in relation to the base currency USD is mainly hedged.

Investors in the Fund can redeem units on any business day in Luxembourg except days where the decisive markets are closed: United States (US) or simultaneously Hong Kong (HK) and Singapore (SG).

Details of the closing days are available here:

<https://www.ubp.com/en/offices/ubp-asset-management-europe-sa>.

The recommended holding period is at the maturity of the Fund.

Any income received by the Fund is reinvested (capitalisation share class).

Risk and reward profile

With lower risk, With higher risk,

← →

potentially lower rewards potentially higher rewards

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 3 reflects limited potential gain and/or loss in the value of the portfolio.

This is due to investments in fixed income securities on Emerging and high yield markets.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail to honor its contractual obligations. This may result in a financial loss for the Fund.

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Emerging market risk: The Fund invests in developing overseas markets which carry a higher risk than investing in larger established markets. Investments in emerging markets are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in emerging markets rather than more developed countries may encounter difficulties when buying and selling investments. Emerging markets are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.

Full details of risks are disclosed in the chapter 'Risk Factors' in the prospectus.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	3.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	0.80%
-----------------	-------

Charges taken from the Fund under certain specific conditions

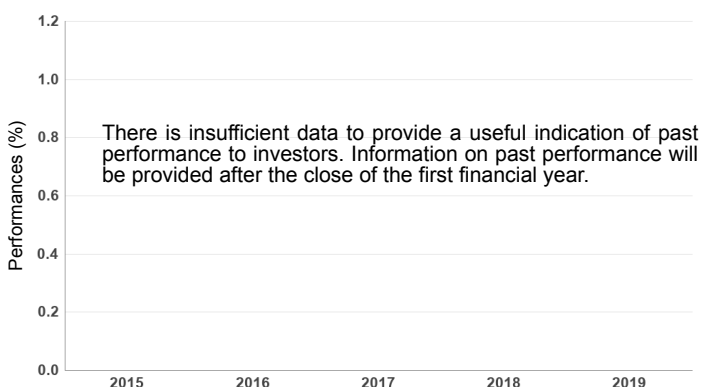

Performance fee	None
-----------------	------

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower. Your financial advisor or distributor can inform you of the associated entry and exit charges.

The indicated ongoing charges are an estimate based on the expected total amount of charges. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another fund.

For more information about Fund charges, please refer to the relevant chapters of the prospectus, which is available at www.ubp.com.
