What is this product?

TYPE OF PRODUCT

The Fund is a sub-fund of UBAM, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide on its pure and simple liquidation if its net assets represent less than EUR 10 million (or equivalent value in another currency) or if the economic and/or political environment was to change or for any economic and financial reasons for which the Board of Directors considers that it is in the general best interests of shareholders to liquidate the Fund.

OBJECTIVES

The Fund seeks to grow capital and generate income by investing primarily in bonds denominated in USD.

The Fund is actively managed.

The Fund is allowed to invest without limits in currencies other than its base currency (USD) but the currency risk is limited to 10% of its net assets.

A minimum of 50% of the bond investments will be in issuers deemed to maintain sustainable characteristics with a minimum Environmental, Social and Governance (ESG) rating of BBB for developed market issuers and BB for emerging market issuers as measured by MSCI ESG research or if such rating is not available an equivalent internal rating assigned by the Investment Manager. ESG investment strategy is based on three pillars: (i) Sector exclusion according to the UBP Responsible Investment policy; (ii) ESG integration on: (a) sovereign issuers through an internal quantitative scoring system and a qualitative ESG check and (b) corporate issuers through the analysis of ESG and financial factors; (iii) a preference for Green, Social and Sustainability bonds.

The Fund uses the index the ICE BofA US Treasury Index (the "Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Fund. Although the Fund's securities will primarily correspond to those of the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities

The Fund may invest its net assets up to:

- 20% in High yield
- 10% in Emerging countries.

The Fund's base currency is USD.

Any income received by the Fund is reinvested (capitalisation share class).

INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The Fund is compatible with investors who may bear capital losses and who do not need capital guarantee. The Fund is compatible with clients who wish to hold their investment over 3 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level. Poor market conditions are unlikely to impact the Fund's capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the prospectus for more information on the specific and material risks relevant to the Fund not included in the summary risk indicators.

This Fund does not include any protection from future market performance, so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		3 years USD 10'000		
		If you exit after 1 year	If you exit after 3 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	USD 6'350	USD 7'130	
	Average return each year	-36.5%	-10.7%	
Unfavourable scenario	What you might get back after costs	USD 8'730	USD 8'300	This type of scenario occurred for an investment in the product between July 2020 and June 2022.
	Average return each year	-12.7%	-6.0%	
Moderate scenario	What you might get back after costs	USD 9'780	USD 10'270	This type of scenario occurred for an investment in the product between March 2014 and March 2017.
	Average return each year	-2.2%	0.9%	
Favourable scenario	What you might get back after costs	USD 11'020	USD 11'410	This type of scenario occurred for an investment in the product between July 2017 and July 2020.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if the product is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with BNP Paribas S.A., Luxembourg Branch and are segregated from the assets of other sub-funds of the SICAV. The assets of the Fund cannot be used to pay the debts of other sub-funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10'000 is invested

Investment of USD 10'000	If you exit after 1 year	If you exit after 3 years
Total costs	USD 363	USD 518
Annual cost impact (*)	3.6%	1.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.6% before costs and 0.9% after costs.

Composition of costs
