## ABOUT THE FUND

The Fund seeks to grow capital and generate income primarily by investing in worldwide equities, including emerging countries. The Fund is actively managed and relatively concentrated (typically under 50 names names) with low turn-over.

The Fund will invest primarily in biodiversity fixers (companies which through their revenues are reducing biodiversity loss) and value chain champion companies (companies which are not necessarily traditional impact companies, but have huge supply chains and are taking this responsibility seriously).

The investment strategy relies on external ESG ratings, as well as internal analysis.

The construction of the universe is driven by positive inclusion, rather than exclusion. The Investment Manager builds a universe through adherence to the intensity of biodiversity contribution "B-IMAP" system and positive ESG credentials. The Investment Manager performs a negative screening, based on the exclusion list and ESG profile to filter the investment universe. Impact and ESG credentials are fully integrated into decision making regarding the purchase, sale and position-sizing of underlying holdings. The 'B-IMAP' score in combination with ESG and financial analysis will determine the size of the positions in the portfolio.

The Fund may invest up to:

- 100% of its net assets in Small and Mid-Capitalization with a minimum market capitalization of EUR 150 million.

- 20% of its net assets in fixed income and money market instruments.

## PERFORMANCE EVOLUTION GBP (NET OF FEES)

Performance over 10 years or since inception. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise.

## PERFORMANCE HISTORY GBP (NET OF FEES)

UBAM - BIODIVERSITY RESTORATION	6.15 %	12.56 %	10.02 %				-6.91 %

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).
