Portfolio invested in equities issued by 30 leading global companies

ABOUT THE FUND

The fund invests in a basically equally-weighted portfolio of 30 leading global companies. These companies must have a dominant business franchise, strong historical returns on investment, and visibility on the strength of future earnings and cash flows. The fund adopts a pure bottom-up approach with a risk control overlay and aims to outperform the broader equity market over the economic cycle.

The Fund aims to perform better than its benchmark on two ESG indicators. First by promoting a lower carbon footprint paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Fund's weighted average carbon intensity below that of its benchmark. Second by promoting better corporate sustainability than its benchmark by excluding companies in breach of the UN Global Compact (UNGC). The Fund also applies a minimum 20% reduction rate, at all times, on its investment universe resulting from the application of ESG exclusion criteria.

PERFORMANCE EVOLUTION CHF (NET OF FEES)

Performance over 10 years or since inception. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise.

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

GLOSSARY
Benchmark

Index used as basis for measuring the performance of an investment fund. Also called reference index or comparison index.

Volatility

Volatility is a statistical measure of the dispersion of returns for a given security or market index. In most cases the higher the volatility the riskier the security. Computed

over the last 10 years or since inception.

Tracking error

The tracking error measures how close security or portfolio returns are to benchmark returns over time. The TE can be viewed as an indicator of how actively a fund is managed and its corresponding risk level. Computed over the last 10 years or since inception.
