## What is this product?

### TYPE OF PRODUCT

The Fund is a sub-fund of UBAM, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

### TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide on its pure and simple liquidation if its net assets represent less than EUR 10 million (or equivalent value in another currency) or if the economic and/or political environment was to change or for any economic and financial reasons for which the Board of Directors considers that it is in the general best interests of shareholders to liquidate the Fund.

### OBJECTIVES

The Fund seeks to grow capital and generate income by investing primarily in Emerging countries high yield or investment grade corporate bonds.

The Fund is actively managed and invests mainly in securities in the currencies of OECD countries, but also in Emerging countries currencies up to 20%. The average duration of the portfolio will be between 1 and 4 via direct investment and / or via derivative products use.

The Fund will invest a minimum of 2/3 of its net assets in products/issuers with a minimum rating of B- (S&P or Fitch), B3 (Moody's) or an equivalent rating by another rating agency and up to 1/3 of its net assets in products/issuers with a lower rating.

The Fund may invest up to 15% of its net assets in non-rated products/issuers.

The investment strategy relies on credit and macroeconomic assessment, Environmental, Social and Governance (ESG) analysis as well as on relative value.

The ESG analysis relies on external and internal research. In the absence of MSCI ESG rating, an internal rating may be assigned by the Investment Manager.

The sustainable objective of the Fund is to provide a lower carbon footprint than the investment universe, as measured by the JP Morgan Corporate EMBI Diversified Index.

The investment process includes a first phase of investment universe filtering and a second phase of ESG bottom-up research.

Up to 30% of the net assets of the Fund can be invested in issuers with a MSCI ESG rating below BB.

The first phase consists in selecting issuers with sound ESG quality and avoiding controversial business activities as well as companies in breach of international norms (norms-based screening).

The second phase integrates ESG considerations into the issuers' qualitative credit assessment conducted by the Investment Manager. This analysis relies on different sources of information and data as well as external ESG data and scoring providers.

The ESG analysis covers at least 90% of the Fund's portfolio.

The Fund is not managed in reference to a benchmark.

The Fund may invest its net assets up to:

- 100% in High yield. *This exposure can be increased up to 120% through derivatives*
- 100% in Emerging countries. *This exposure can be increased up to 120% through derivatives*
- 20% in Contingent Convertible capital bonds (CoCos).

High yield bonds are issued by entities whose activity is more sensitive to the economic cycle and pay higher interest. The return on such securities, in the same way as their level of risk, is therefore higher than traditional bond products.

The Fund's base currency is USD.

Any income received by the Fund is distributed (distribution share class).

### INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with average knowledge of the underlying financial instruments and some financial industry experience. The Fund is compatible with investors who may bear capital losses and who do not need capital guarantee. The Fund is compatible with clients who wish to hold their investment over 3 years.

### OTHER INFORMATION

The depositary is BNP Paribas S.A., Luxembourg Branch.

The registrar and transfer agent is Caceis Bank, Luxembourg Branch.

Further information about the Fund (including the prospectus, latest annual and semi-annual reports, latest NAVs) are available free of charge on [www.ubp.com](http://www.ubp.com) or by making a written request to the registered office of the product manufacturer.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product for 3 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

<b>Recommended holding period:</b>		<b>3 years</b>			
<b>Example investment:</b>		<b>USD 10'000</b>			
		<b>If you exit after 1 year</b>	<b>If you exit after 3 years</b>		
<b>Scenarios</b>					
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>				
<b>Stress scenario</b>	<b>What you might get back after costs</b>	USD 6'190	USD 7'020		
	Average return each year	-38.1%	-11.1%		
<b>Unfavourable scenario</b>	<b>What you might get back after costs</b>	USD 8'100	USD 8'100	This type of scenario occurred for an investment in the product between June 2021 and June 2022.	
	Average return each year	-19.0%	-6.8%		
<b>Moderate scenario</b>	<b>What you might get back after costs</b>	USD 9'970	USD 10'510	This type of scenario occurred for an investment in the product between December 2015 and December 2018.	
	Average return each year	-0.3%	1.7%		
<b>Favourable scenario</b>	<b>What you might get back after costs</b>	USD 11'260	USD 11'010	This type of scenario occurred for an investment in the product between January 2015 and January 2018.	
	Average return each year	12.6%	3.3%		

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if the product is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with BNP Paribas S.A., Luxembourg Branch and are segregated from the assets of other sub-funds of the SICAV. The assets of the Fund cannot be used to pay the debts of other sub-funds.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10'000 is invested

Investment of USD 10'000	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	USD 510	USD 1'011
<b>Annual cost impact (*)</b>	5.1%	3.2%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.9% before costs and 1.7% after costs.

## Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 3.00% of the amount you pay in when entering this Investment.	Up to USD 300
