UBAM - Smart Data US Equity, a sub-fund of UBAM

Class: ID USD (Distribution) LU2001978795

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow capital and generate income primarily by investing in equities of US companies.

The Fund aims to actively pick stocks that display the best medium-term sentiment signals within the US large cap universe. Sentiment will be gauged on a real-time basis thanks to the smart data concept which combines two innovative techniques:
- the first is the use of data sources linked to real-time data coming from online sources (Social media, news, blogs) or other alternative data sources and are different from fundamental-based or prices-based data;
- the second is the use of big data techniques to transform the data into a sentiment signal, i.e. a signal to invest into a single stock.

The Fund is actively managed and has no restriction about sectors.

The Fund is not managed in reference to a benchmark.

The Fund's value is calculated and expressed in US Dollars.

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg except days where the decisive market is closed: United States (US).
Details of the closing days are available here:
https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa.

The recommended holding period is minimum five years.

As an equity fund, its holdings can move in line with or return less than the broad stock market, so investors should be aware that the value of their holdings could fall and that they may not get back their initial investment.

Any income received by the Fund is distributed (distribution share class).

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail to honor its contractual obligations. This may result in a financial loss for the Fund.

Currency risk: The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.
