Bloomberg ticker	UBECAEC LX

Lower risk, Higher risk, potentially lower rewards, potentially higher rewards

SPECIFIC RISKS

- ◆ Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.
- ◆ Full details of risks are disclosed in the chapter 'Risk Factors' in the prospectus.

	Fund*	Index
ESG Quality Score	8.24	6.73
Environmental	6.45	6.04
Social	5.14	4.92
Governance	6.22	5.36

Weighted Average Carbon Intensity** 117.31 128.16

*Based on bond holdings only (excluding cash)

** (tons CO2e/\$M Sales)

ABOUT THE FUND

The Fund seeks to grow your capital and generate income primarily by investing as a master / feeder structure at least 85% in the French FCP Convertibles Europe Responsable. The Master, Convertibles Europe Responsable, is an investment fund offering exposure to convertible bonds meeting environmental, social and corporate governance (ESG) criteria. For this selection, the Master's management company relies on external expertise of La Banque Postale Asset Management.

It is an actively managed, well diversified portfolio mainly made up of European and international convertible bonds or equivalent bonds, rated or unrated, where the underlying securities and/or issuer is a company with its headquarters in an OECD member state or listed on a European Market, with substantial weighting in European countries. Thus the Master may be exposed to high yield bonds.

The Master currency risk will be hedged systematically with the aim of achieving a residual direct exposure of less than 10%.

The Fund may invest up to: - 15% of its net assets in liquid assets or derivative financial instruments (for hedging purpose).

Convertible bonds are debt instruments that can be converted into equities under certain conditions. This means that they have characteristics comparable to those of equities while maintaining the characteristics of conventional bonds.

PERFORMANCE EVOLUTION EUR (NET OF FEES)

Performance over 5 years or since inception. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise.

PERFORMANCE HISTORY EUR (NET OF FEES)

	YTD	2020	2019	2018	2017	2016
UBAM - SRI EUROPEAN CONVERTIBLE BOND	0.44 %	4.99 %	4.40 %	-10.22 %	0.65 %	-1.20 %
	April 2021	3 months	1 year	3 years	5 years	Since inception
UBAM - SRI EUROPEAN CONVERTIBLE BOND	0.52 %	0.22 %	9.86 %	0.62 %	1.00 %	-3.37 %

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

GLOSSARY

Benchmark

Index used as basis for measuring the performance of an investment fund. Also called reference index or comparison index.

Derivatives

Derivatives are financial instruments whose prices depend on the price movements in a reference variable, known as the underlying. Underlying assets may be shares, equity indices, government bonds, currencies, interest rates, commodities like wheat and gold, or also swaps. Derivative financial instruments may be unconditional forward transactions or they may be options. They are traded either on futures and options exchanges on standardised terms, or over-the-counter (OTC) on freely negotiated terms. Changes in the price of the underlying lead in certain situations to considerably higher price fluctuations in the derivative. Derivatives can be used to hedge against financial risks, to speculate on price changes (trading) or to take advantage of price differences between markets (arbitrage).

Duration

Duration is the average time to payout. This key figure is used to measure the influence of interest rate movements on the price of a bond or bond fund. Duration is defined in years (e. g. 3-year duration means that the value of a bond would increase by 3% if interest rates fall by 1% and vice versa).

THIS IS A MARKETING DOCUMENT. It reflects the opinion of Union Bancaire Privée, UBP SA or any entity of the UBP Group (hereinafter "UBP") as of the date of issue. It is not intended for distribution, publication, or use in any jurisdiction where such distribution, publication, or use would be unlawful, nor is it directed at any person or entity at which it would be unlawful to direct such a document.
