The performance attribution details the excess return between the fund's gross performance and the attribution index. The attribution index is the fund's indicative index ex CCC rated countries. The idea of having an attribution index different than from the indicative index is to clean up the attribution results from the effects linked to CCC rated countries, as the fund is not allowed to invest in issuers rated below Ba3/B-.

Past performance is not a guide to current or future results. See the disclaimer at the end of this document.
